SEAT No. ______ No. of Printed Pages : 02

[15]

SARDAR PATEL UNIVERSITY
Bsc(CA&IT), 6th Semester
Tuesday,27th JULY, 2021.
Time: 02:00 P.M to 04:00 P.M
Subject Code: PS06DIIT21
Subject :-OOAD Using UML

Total Marks: 50

Q.1 Multiple Choice Questions:

[08]

1 _________ are constructed by interconnecting components, which may well be systems in their own right.
a. Systems b. Complexity
c. Structure d. None of the above

2 ________ is an exceptionally powerful technique for dealing with complexity.
a. Hierarchy b. Decomposition
c. Abstraction d. None of the above

3 _________ is how an object acts and reacts.
a.Object b.Behaviour c.Structure d.None of the above

4 An ________ denotes a service that a class offers to its clients.
a. Operation
b. Behaviour
c. State
d. None of the above.

5 ___________ is a blueprint for creating an object.
a. Class
b. Dependency
c. Generalization
d. Taaged Value

6 ____________is rendered as rectangle with a dog-eared corner
a. Note b. Tagged Values
c. Stereotype d. Constraints

7 The behavior of a system is modeled using ________
a. class diagram b. usecase diagram
c. activity diagram d. interaction diagram

8 Which of the following diagrams is used to model business workflows?
a. deployment diagram b. usecase diagram
c. activity diagram d. interaction diagram

Q.2 **Fill in the blanks or True/False** [06]

1. ________ is the language for expressing each model.
2. First generation languages emphasized on algorithmic abstraction(True/False)
3. An operation that creates an object and/or initializes its state is called ________
4. Graphically, a class is rendered as a rectangle. (True/False)
5. Class is rendered as__________
6. Activities identify high-level services provided by the system(True/False)

Q.3 Explain any Six [12]

1. Define Systems and Complexity.
2. Explain role of Abstraction.
3. What is a State of an Object?
4. List three most common operations on object.
5. Define Note.
6. Define Constraint.
7. Define Interaction.
8. Define StateMachine.

Q.4 Attempt any Four [24]

1. Write short note on inherent complexity of software.
2. Write short note on categories of analysis and design.
3. Discuss about possible relationships formed among the objects with example.
4. Discuss about possible relationships formed among the classes with example.
5. Explain Modeling Comments in brief.
6. Explain Modeling Comments in brief..
7. Write a short note on Use Case Diagrams.
8. Explain Structure with Figure in detail.
