SARDAR PATEL UNIVERSITY

BCA Semester-1 External Examination – Feb-2026 [NEP]

US01MABCA01 || Programming Fundamentals Using C

Date : 24-2-2026

Time : 10.00 a.m. – 12.30 p.m.

Total : 50 Marks

Q-1 Select the appropriate option for the following questions:

[10]

- 1) _____ is a step by step approach to solve any problem.
A Process C Algorithm
B Programming Language D Compiler
- 2) Translator which converts high-level language programs into machine language program is called _____.
A Compiler C Assembler
B Interpreter D Translator
- 3) The value that cannot be changed during program execution is known as _____.
A Variable C Operator
B Constant D None of these
- 4) _____ format specifier used for integer data type.
A %c C %a
B %f D %d
- 5) _____ loop executes at least once.
A while loop C if
B do...while D For
- 6) Individual value in array is called _____.
A Number C Index
B Element D Element and number
- 7) gets () function is available in _____ header file.
A <math.h> C <stdio.h>
B <conio.h> D <co.h>
- 8) _____ function counts and returns the number of characters in a string.
A strcmp() C strlen()
B strrev() D strcon()
- 9) C language is _____ language.
A High level C Assembly language
B Machine D Low level language
- 10) _____ section is compulsory in C program.
A Main function C Documentation
B Definition D Division

Q-2 What is flow chart? List and explain all symbols used to draw a flow chart.

[10]

OR

Q-2 What is an algorithm? Write characteristics of an algorithm and also Write an algorithm To find maximum number out of two numbers.

[10]

Q-3 Draw and explain basic structure of C program with one suitable program. **[10]**

OR

Q-3 Define variable. Write rules for variable name and also explain declaration and initialization of variable with syntax and example. **[10]**

Q-4 Explain all looping statements (Iterative control structures) with syntax and example. **[10]**

OR

Q-4 Define array and 1-D array. Also explain declaration and initialization of 1-D array with syntax and example. **[10]**

Q-5 Define string. List all and explain any four string handling functions with syntax and example. **[10]**

OR

Q-5 List and explain functions of <math.h> header files with syntax and example. **[10]**
