SARDAR PATEL UNIVERSITY
B.C.A Examination, 1st Semester
Monday, 10th February, 2020

Morning Time: 10:00 A.M to 01:00 P.M

Subject Code: US01BCA21

Subject: Programming Fundamental Using C

Total Weight age/Marks: 70

Q.1 Multiple Choice Questions.

10

1. The process of walking through a program's logic on paper before you actually write the program is called _____.
A. desk checking B. flowcharting
C. pseudo coding D. testing
2. What is the standard decision symbol for a flowchart?
A. circle B. lozenge
C. diamond D. square
3. The value cannot be changed during program execution is known as _____.
A. Variable B. Operator
C. constant D. None of these
4. Which of the following backslash character constant is used for horizontal tab?
A. \n B. \t
C. \h D. \y
5. Do-while loop is also known as _____ loop.
A. Entry level B. Exit level
C. a & b D. None of these
6. '\0' is called _____.
A. Escape Sequence B. Character value
C. Null Character D. Symbolic Constant
7. In two dimensional array the second subscript is define _____ size.
A. Row B. column
C. Vector D. None of these
8. _____ operation is performed on string.
A. Reading B. Copying
C. Writing D. All of above
9. Ampersand (&) is not required when read the _____ value.
A. int B. float
C. string D. All of above
10. If both the string are same then the comparison value is _____.
A. Zero B. One
C. Minus One D. None of these

P.T.O

(1)

Q.2 Answer the following questions in short. (Any 10)

20

- 1) Write an algorithm to find Simple Interest.
- 2) What is an algorithm? List Characteristics of an algorithm.
- 3) What is High Level Language?
- 4) Write Rules of variable name.
- 5) Explain if statement with example.
- 6) Explain typedef in brief.
- 7) Explain do-while statement with example.
- 8) Write the syntax of compile time initialization of 1D array in c.
Also give example.
- 9) Explain break and continue statement in C.
- 10) What is string? Write the syntax of declaring string in c. Also give example.
- 11) How we can initialize the string variable. Give one example.
- 12) Explain the isalpha () function.

Q.3(A) What is Flowchart? Explain symbols used to draw a flow chart. Draw a flowchart to find sum of odd value and even value digits of a given number.

10

OR

Q.3(A) Differentiate between Compiler and Interpreter. Draw a flowchart to print N terms of Fibonacci series.

10

Q.4(A) Explain basic data types used in C language.

06

(B) Explain Basic Structure of C program.

04

OR

Q.4(A) What is operator? List all operators and explain any 2 operators.

06

(B) What is Variable? How to declare and initialization of variable with example.

04

Q.5(A) Define 1D array? Explain the declaration and initialization of 1D array with syntax and example.

06

(B) Explain looping statement with syntax and example.

04

OR

Q.5(A) Define 2D array? Explain the declaration and initialization of 2D array with syntax and example.

06

(B) Explain while and for loop with syntax and example.

04

Q.6(A) Explain following function with syntax and example.

06

a) strlen () b) strcat () c) strcpy ()

(B) Explain the following library function with syntax and example

04

a) sqrt () b) isdigit ()

OR

Q.6(A) Explain following function with syntax and example.

06

a) strrev () b) strcmp () c) gets ()

(B) Explain the following library function with syntax and example

04

a) pow () b) isdigit ()
