SARDAR PATEL UNIVERSITY
External Examination – February-2022
BCA SEMESTER-I (CBCS – NEW COURSE)
[US01BCA51]: Programming Fundamentals using C
Friday, 11th February-2022

Time: 3.00pm to 5.00pm

Total Marks: 70

Note: Figure indicates, right side is a maximum marks for each question

Que:1 Select an appropriate option for below given statements:

[10]

1. The translator program used in assembly language is called _____.
a) Compiler b) Interpreter c) Assembler d) Translator
2. What is the standard decision symbol for a flowchart?
a) Circle b) Lozenge c) Diamond d) Square
3. C language is _____.
a) High Level Language b) Machine Level Language
c) Assembly Level Language d) Low Level Language
4. From the following which section consists of Header files?
a) main() b) Definition c) Documentation d) Link Section
5. The combination of ? and : is known as _____ operator
a) Ternary b) Arithmetic c) Dot d) Relational
6. The Switch expression can be a _____ type.
a) int b) Float c) Double d) String
7. _____ loop execute at least once.
a) do..while b) while c) for d) switch
8. For declaring two- dimensional array _____ subscript is use.
a) One b) Two c) Three d) Four
9. Reading single character form the keyboard _____ function is use.
a) putchar() b) getchar() c) getc() d) putc()
10. _____ function count and return the number of character in a string.
a) strcpy() b) strlen() c)strupr() d) strrev()

Que:2 Do as Directed:

[08]

- Fill in the blanks

1. _____ is a step by step approach to solve any problem.
2. _____ format specifier used for floating data type.
3. In Array subscript can begin with number _____.
4. A group of character is known as _____.

[P.T.O]

[1]

- State whether the following statements are True or False

5. Flowchart is a pictorial representation of an algorithms. [True / False]
6. The value can be changed during program execution is known as variable. [True / False]
7. Individual value in array is called an Elements. [True / False]
8. printf () and scanf () is library type of functions. [True / False]

Que:3 Give brief answers for the following questions: (Attempt any Ten)

[20]

1. What is an algorithm? List characteristics of an algorithms.
2. Write difference between Interpreter and Compiler.
3. What is an Editor? Give any three examples of well-known Editors.
4. Write Rules of variable name.
5. Explain printf() statement with example.
6. Explain ternary operator in brief.
7. Explain break and continue statement.
8. What is array? List out the type of array use in c programming.
9. Explain the clrscr () and getch() functions.
10. What is string? Explain with example, how we can initialize the string variable.
11. Define function. List out type of function use in c.
12. Write difference between user define function and library function.

Que:4 Give answers for the following questions in detail: (Attempt any Four)

[32]

1. What is Flowchart? Explain Rules to draw flowchart. Also explain symbols used to draw flowchart.
2. Write a note on Generation of Languages.
3. What is operator? List all operators and explain any three operators.
4. Draw and explain basic structure of C program in detail.
5. Explain looping statement with syntax and example.
6. Define 1-D array? Explain the declaration and initialization of 1-D array with syntax and example.
7. Explain following string functions with syntax and example.
a) strlen () b) strcat () c) strcpy () d) strrev ()
8. Explain function definition with syntax and example.
