- Q-2** . Explain following function categories with syntax and example [10]
1. No passing parameters and No return value
2. Passing parameters and No Return value
OR
- Q-2** Explain Function definition with syntax and example and also explain actual and formal parameters in detail with syntax and example. [10]
- Q-3** Explain structure initialization and structure within structure with example. [10]
OR
- Q-3** What is structure? Explain structure definition and declaring structure variable with syntax example and also explain how we can access structure members with example. [10]
- Q-4** What is pointer? List benefits of pointer and explain declaration, initialization and how can we access a variable through its pointer with syntax and example. [10]
OR
- Q-4** What is dynamic memory allocation? List and explain dynamic memory allocation function with syntax and example. [10]
- Q-5** Explain getc() an putc() function with syntax and one suitable program. [10]
OR
- Q-5** Explain fprintf() and fscanf() function with syntax and one suitable program. [10]
