SARDAR PATEL UNIVERSITY
B. C. A (Semester 2) Examination - 2026
US02MABCA01: Advanced C Programming

Date: 13th April 2026, Monday
Time: 10:00 AM to 12:30 PM

Total Marks: 50

Q-1 MCQs

[10]

- 1 The parameter is also known as _____.
(a) argument (b) variable (c) data type (d) array
- 2 A function can be surrounded by _____.
(a) parentheses (b) square brackets (c) queerly brackets (d) none
- 3 The variable declared inside a function is called _____.
(a) global (b) local (c) function (d) none
- 4 The name of a structure is referred to as _____.
(a) Label (b) Tag Name (c) Index (d) none
- 5 _____ operator is used with a pointer to access the value of the variable whose address is contained in the pointer.
(a) address of (b) sizeof (c) indirection (d) member selection
- 6 Which of the following is not a C memory allocation function?
(a) malloc() (b) calloc() (c) alloc() (d) realloc()
- 7 If the functions are declare in the global declaration section the prototype is referred as _____ prototyped.
(a) global (b) local (c) formal (d) none
- 8 By default, all the files are opened in _____ mode.
(a) binary (b) text (c) octal (d) decimal
- 9 The mode _____ is used for opening a file for updating.
(a) r (b) w (c) a (d) r+
- 10 _____ is datatype of file pointer.
(a) int (b) double (c) string (d) file

Q-2 What is User Defined Function? Write advantages of User defined function and also explain function call and function declaration with syntax and example. **[10]**

OR

Q-2 Explain passing 1-D array to function with example and also explain recursive function with example. **[10]**

Q-3 What is Union? Explain union with syntax and example and also write difference between structure and union. **[10]**

OR

Q-3 Explain array of structure and array within structure with example. **[10]**

Q-4 What is dynamic memory allocation? List and explain dynamic memory allocation function with syntax and example. **[10]**

OR

Q-4 Explain pointer arithmetic expressions and pointer to an array in detail. **[10]**

Q-5 Explain `getc()` and `putc()` function with syntax and one suitable program. **[10]**

OR

Q-5 Explain error handling during I/O operations with syntax and one suitable program. **[10]**
