

2.30 – 5.30 pm

Total Marks: 70

[10]

- [20]**

- [P.T.O.]**

- Q.3**
- A** Define pointer. How can we declare and initialize pointer variable? Explain with syntax and example. How can we access value of variable through pointer variable? **[06]**
- B** Explain pointer arithmetic with example. **[04]**
- OR**
- Q.3**
- A** Write a note on Dynamic memory allocation. **[06]**
- B** Explain pointer and function using suitable example. **[04]**
- Q.4**
- A** What is structure? Explain how to declare structure and structure variable and also how to initialize structure members with suitable example. **[07]**
- B** Explain file modes available to manage the file in c language. **[03]**
- OR**
- Q.4**
- A** Explain structure within structure and array of structure with example. **[06]**
- B** Explain following function with syntax and example. **[04]**
- (i) fprintf()
(ii) fclose()
- Q.5**
- A** What is stack? Write the algorithm for PUSH and PEEP operation of stack. **[05]**
- B** What is Data structure? Explain various operation perform on data structure. **[05]**
- OR**
- Q.5**
- A** List application of stack and write the algorithm for POP and CHANGE operation of stack. **[05]**
- B** Write a short note on primitive and non-primitive data structure. **[05]**
- Q.6**
- A** What is queue? List types of queue and write algorithm for insertion and deletion of element from simple queue. **[10]**
- OR**
- Q.6**
- A** What is Link list? List types of linked list and write algorithm for insert element at last and delete an element from singly link list. **[10]**

Best of Luck
