No. of Printed Pages: 02

[23]

SARDAR PATEL UNIVERSITY
External Examination – Aug, 2022
BCA Semester – II (CBCS)(Regular)
US02CBCA51: Advance C Programming
Sat/Sunday' 20th Aug, 2022

Time: 2.00pm to 4.00pm

Total Marks: 70

Note: Figure indicates right side is maximum marks for each question

Que: 1 Select an appropriate answer for the following statements.**[10]**

1. By default _____ is a return type of a C function.
[a] void [b] int [c] float [d] None of these
2. Structure is a _____ data type.
[a] Derived [b] built-in [c] user-defined [d] None of these
3. A function declaration is also known as _____.
[a] function implementation [b] function call
[c] function type [d] function prototype
4. The name of a structure is referred to as _____.
[a] Label [b] Tag name [c] Index [d] None of these
5. The variables declared in a structure definition are called as its _____.
[a] Objects [b] Members [c] Records [d] None of these
6. _____ operator connects the structure name to its member.
[a] Underscore (_) [b] Dot (.) [c] Exclamation (!) [d] None of these
7. _____ operator is used with a pointer to access the value of the variable whose address is contained in the pointer.
[a] address of [b] sizeof [c] Member selection [d] Indirection
8. How will you free the allocated memory?
[a] remove(ptr) [b] free(ptr) [c] dealloc(ptr) [d] destroy(ptr)
9. _____ is datatype of file pointer.
[a] int [b] double [c] string [d] FILE
10. The mode _____ is used for opening a file for updating.
[a] r [b] w [c] a [d] r+

Que:2 Do as Directed

[08]

- Fill in the blanks

1. A function which calls itself is known as _____ function.
2. A _____ is a collection of different data items.
3. Indirection operator is also known as _____ operator.
4. When fopen() is not able to open a file, it returns _____ .

-State whether the following statement is True or False

5. Keyword “return” is used to return the value which is evaluated by the function.
6. Both Union and Structure has similar type of syntax.
7. int *ptr; defines a pointer variable to an integer.
8. By default, all the files are opened in text mode.

Que: 3 Answer the following questions in brief: (Attempt any Ten)

[20]

1. What are the advantages to divide the program into function?
2. Write a syntax to declare a function.
3. Explain actual and formal parameter of user defined function.
4. Write and explain syntax for structure definition.
5. Write any two differences between Structure and Union.
6. Write the ways to access structure members.
7. Discuss Pointer and Pointer variable.
8. List out memory management functions.
9. Write benefits of pointer.
10. List basic file operations performed on file.
11. Write down the syntax to open the text file both in read and write mode.
12. List and explain different file modes.

Que: 4 Answer the following questions in detail (Attempt any Four)

[32]

1. Discuss function call with syntax and appropriate example.
2. List categories of user defined function and explain any two of them with example.
3. Discuss array within a structure through example.
4. Explain Union with syntax and example.
5. Explain pointer to an array with example.
6. Discuss malloc() and calloc() with suitable example.
7. Explain fopen() and fclose() with example.
8. Discuss error handling functions with example.
