

SEAT No: _____

No. of Printed Pages: 02

Roll No. _____

[22]

SARDAR PATEL UNIVERSITY
External Examination – Aug. 2022
BCA Semester – II (CBCS)(NC)
US02CBCA21: Advance C Programming
Saturday 26th Aug, 2022

Time: 2.00pm to 4.00pm

Total Marks: 70

Note: Figure indicates right side is maximum marks for each question

Que: 1 Select an appropriate answer for the following statements.**[10]**

1. The variable declared inside the function is called _____ variable.
[a] local [b] global [c] function [d] None of these
2. A function can be surrounded by _____.
[a] parentheses [b] square brackets [c] curly brackets [d] None of these
3. A function which calls itself is known as _____.
[a] Reverse [b] Recursive [c] Reserve [d] None of these
4. A _____ is a collection of data items under one name in which the items share the same storage.
[a] Structure [b] Union [c] Array [d] None of these
5. Which of the following cannot be a structure member?
[a] Another structure [b] Function [c] Array [d] None of these
6. The variables declared in a structure definition are called as its _____.
[a] Objects [b] Members [c] Record [d] None of these
7. Which of the following is not a C memory allocation function?
[a] malloc() [b] calloc() [c] realloc() [d] alloc()
8. How will you free the allocated memory?
[a] remove(ptr) [b] free(ptr) [c] dealloc(ptr) [d] destroy(ptr)
9. When fopen() is not able to open a file, it returns _____.
[a] EOF [b] Null [c] one [d] zero
10. By default, all the files are opened in _____ mode.
[a] binary [b] text [c] octal [d] decimal

Que:2 Do as Directed

[08]

- Fill in the blanks

1. The parameter is also known as _____.
2. A _____ is a special data type available in C that allows to store different data types in the same memory location.
3. Indirection operator is also known as _____ operator.
4. The mode _____ is used for opening a file for updating.

-State whether the following statement is True or False

5. The parameters used in a function call are called actual parameter.
6. Dot (.) operator connects the structure name to its member.
7. `int *ptr = &x;` defines and initializes a pointer to the address of x.
8. `fopen (filenm, "r");` is a valid statement for opening a file for reading mode only.

Que: 3 Answer the following questions in brief: (Attempt any Ten)

[20]

1. Write and explain syntax for function call.
2. What are the components of user defined function?
3. List all categories of user define functions.
4. Write and explain syntax of structure variable declaration.
5. Compare structure with Union.
6. Explain how to access members of structure.
7. Define pointer variable.
8. What is dynamic memory allocation?
9. What does `calloc()` can do?
10. List basic file operations performed on file.
11. Discuss `fprintf()` and `fscanf()`.
12. List and explain different file modes.

Que: 4 Answer the following questions in detail (Attempt any Four)

[32]

1. Explain function definition with syntax and appropriate example.
2. Explain recursive function with example.
3. Explain structure initialization with rules and example.
4. Write a note on Union.
5. Explain pointer arithmetic expressions in detail.
6. Explain declaration and initialization of pointer variable with syntax and example.
7. Explain `feof()` and `ferror()` with syntax.
8. Discuss `getc()` and `putc()` with example.
