

[63]

SARDAR PATEL UNIVERSITY
B.C.A. (SEMESTER – II) NC EXAMINATIONS – 2026
US02BCA51: ADVANCED C PROGRAMMING

Date: 11/04/2026 (Saturday)

Time: 10.00 AM to 01.00 PM

Total: 70 Marks

Q-1 Multiple Choice Questions.

[10]

1. A function which calls itself is known as _____.
A. reverse C. recursive
B. reserve D. None of these
2. The parameter is also known as _____.
A. argument C. variable
B. data type D. array
3. A _____ is a collection of different data items.
A. structure C. array
B. char D. None of these
4. The variables declared in a structure definition are called as its _____.
A. objects C. members
B. record D. None of these
5. Which of the following defines a pointer variable to an integer?
A. int &ptr; C. int **ptr;
B. int &&ptr; D. int *ptr;
6. How will you free the allocated memory?
A. remove(ptr) C. free(ptr)
B. dealloc(ptr) D. destroy(ptr)
7. The mode _____ is used for opening a file for updating.
A. r C. w
B. a D. r+
8. _____ is datatype of file pointer.
A. int C. double
B. string D. FILE
9. Which of the following is not a C memory allocation function?
A. malloc() C. calloc()
B. realloc() D. alloc()
10. A _____ statement that returns the value evaluated by the function.
A. goto C. break
B. return D. None of these

Q-2 Short Questions. (Attempt any Ten).

[20]

1. List all the categories of user-defined functions.
2. Write and explain syntax for function definition.
3. Write and explain syntax for structure variable declaration.
4. Differentiate structure and union.
5. List out memory management functions.
6. List out benefits of pointers.
7. Differentiate: printf and fprintf
8. List out different file modes.
9. Explain any one file handling functions in brief.
10. Explain recursion in brief.
11. Which are the ways to access structure members?

(P.T.O.)

Q-3

[A] Explain Function declaration with syntax and example.

05

[B] Explain recursive function with example.

05

OR

Q-3 Explain passing 1-Darray to function with example.

10

Q-4

[A] Explain declaring structure variable with syntax and example.

05

[B] Explain array of structure with example.

05

OR

Q-4 Which different methods for transferring structure from one function to another function?
Explain any one method with example.

10

Q-5 Explain declaration and initialization of pointer variable with syntax and example.

10

OR

Q-5

[A] Explain malloc() with example.

05

[B] Explain free() with example.

05

Q-6 Explain fopen() and fclose() function with syntax and one suitable program.

10

OR

Q-6 Explain error handling during I/O operations.
