

Note: - Answers of all the questions (including multiple choice questions) should be written in the provided answer book only.

Q.1 Multiple choice questions:**[10]**

1. The data contain in the database is both accurate and consistent is called _____
 - a) Data Independency
 - b) Data Consistency
 - c) Data Redundancy
 - d) Data Integrity.
2. Which of the following is not three-schema architecture for a database?
 - a) Hierarchical
 - b) Physical
 - c) Network
 - d) Relational
3. Which of the following scheme continues the definition of the store record?
 - a) Conceptual
 - b) Physical
 - c) Internal
 - d) Relational
4. _____ query is of type DDL.
 - a) Insert
 - b) Update
 - c) Delete
 - d) Create
5. Rollback query is belonging to type of query.
 - a) TCL
 - b) DDL
 - c) DML
 - d) DCL
6. _____ Statement is used to delete a structure.
 - a) Connect
 - b) Update
 - c) Delete
 - d) Drop
7. _____ integrity constraint requires that a condition be true or unknown for the row to be processed.
 - a) NULL
 - b) CHECK
 - c) NOT NULL
 - d) Default
8. The function converts char, a CHARACTER value expressing a number, to a NUMBER data-type.
 - a) TO_NUMBER
 - b) TO_CHAR
 - c) TO_DATE
 - d) TO_NUM

- 9 The clause imposes a condition of the group by clause.
 - a) group by
 - b) Having
 - c) sub query
 - d) where
- 10 The statement provides various types of access to database object.
 - a) Select
 - b) Privileges
 - c) Revoked
 - d) grant

Q.2 Fill in the Blanks and True or False [08]

- 1 Relation can be represented as _____
- 2 _____ Command is used to change a content of table.
- 3 The data held across the primary key column must be _____.
- 4 To make the change permanent a _____ statement has to be given at the SQL statement.
- 5 DBA has the centralized control of data in DBMS. (True / False)
- 6 Order by clause is use with select statement to display unique records of a column specified. (True / False)
- 7 Primary Key represents relationship between tables. (True / False)
- 8 To reduce redundant data to the minimum possible and object is creating called a Views. (True / False)

Q.3 Answer the following questions (Attempt any Ten) [20]

- 1 Define: Super Key and Candidate Key
- 2 Define Record, Tuple.
- 3 What is relationship? List types of relationship.
- 4 Explain distinct clause in brief.
- 5 List types of DML statements.
- 6 Briefly explain the use of ORDER BY clause.
- 7 Write down the syntax to apply a Foreign Key at Table level.
- 8 List all Aggregate functions available in oracle.
- 9 List limitations on CHECK Constraint.
- 10 Explain Group By clause.
- 11 Explain the use of rollback.
- 12 List the different types of joins.

Q.4 Answer the following questions (Attempt any Eight) [32]

- 1 Explain the three-schema architecture for a Database Management System.
- 2 Explain network and hierarchical data model.
- 3 Explain various basic data types used in oracle.
- 4 Explain how to filtering the data in oracle. Explain with proper syntax and example.
- 5 List all Scalar functions available in oracle and explain with appropriate syntax and example.
- 6 List all character functions available in oracle and explain with appropriate syntax and example.
- 7 What is use of sequences? Explain creating & dropping it with example.
- 8 What is index? How various types of indexes are created? Explain with syntax and example.
