

[80]

Time: 2:00 pm to 5:00 pm

Marks: 70

Q1 Multiple Choice Questions:

[10]

1. Which of the following is not three-schema architecture for a database?
[A]. Physical [B]. Network [C]. Hierarchical [D]. Relational
2. Column of the relation are referred as _____.
[A]. Attributes [B]. Relationship [C]. Tuples [D]. Record
3. _____ has the centralized control of data in DBMS.
[A]. Programmer [B]. DBA [C]. Native user [D]. Casual User
4. _____ Clause is use with select statement to arrange records in ascending order or descending order
[A]. Order [B]. Arrange [C]. Order By [D]. Arrange By
5. _____ SQL statement is use to modify data type of any table column.
[A]. Change [B]. Create [C]. Alter [D]. Update
6. When a column is defined as not null, that column becomes a _____ column.
[A]. Mandatory [B]. Primary Key [C]. Unique [D]. Not Compulsory
7. The data held across the primary key column must be _____.
[A]. Repetitive [B]. Unique [C]. Simple [D]. Simple
8. The _____ clause imposes a condition of the group by clause.
[A]. Group By [B]. Sub Query [C]. Having [D]. Where
9. A Sub query is also termed as _____ query
[A]. Joins [B]. View [C]. Index [D]. Nested
10. _____ makes and saves the current points the processing of transaction.
[A]. Savepoint [B]. Rollback [C]. Commit [D]. Indexes

Q2 Write Short Questions. [Any 10]

[20]

1. Define : Information and Database
2. What is super key and Candidate Key?
3. Define : Tuple and Domain
4. What are the restrictions on ALTER TABLE?
5. Explain how to remove table along with its structure and data?
6. List types of DML statements.
7. Explain pattern matching in brief.
8. Explain UID and SYSDATE in detail.
9. What are table level and column level constraints?
10. Explain use of commit.
11. Discuss Group By clause with syntax and example.
12. List different types of joins.

- Q3 [A] Explain the three-schema architecture for a Database Management System. [05]
Q3 [B] Explain classification of users of DBMS. [05]

OR

- Q3 [A] Explain relational and network data model. [05]
Q3 [B] Explain types of relationship with example. [05]

- Q4 [A] Explain how user can create table with its syntax and example. [05]
Q4 [B] Explain update statement with its syntax and example. [05]

OR

- Q4 [A] Explain various ways to insert records in a table. [05]
Q4 [B] Explain how to filter the data in oracle with proper syntax and example. [05]

- Q5 [A] Define Primary key and Foreign key concept with appropriate syntax and example. [10]

OR

- Q5 [A] List all Aggregate functions available in oracle and explain any Four of them with appropriate syntax and example. [10]

- Q6 [A] What is subquery? Explain subquery with its types in brief. [05]
Q6 [B] How user can create index explain with syntax and example. [05]

OR

- Q6 [A] Explain concept of self join with example. [05]
Q6 [B] Discuss use of rollback and savepoint with syntax and example. [05]
