SARDAR PATEL UNIVERSITY
BCA Semester-2 Examination - July -2023
US02CBCA53 || Database Management System-I

Date : 31-7-2023

Time : 02.00 p.m. – 05.00 p.m.

Total : 70 Marks

Q-1 Select the appropriate option for the following questions:

10

- 1) Meaningful data is called _____.
A. DBMS
B. DATABASE
C. Information
D. None of these
- 2) _____ is the Advantage of DBMS.
A. Cost
B. DBMS
C. Requirement of backup Facility
D. Reduction in redundancies
- 3) _____ query is of type DDL.
A. Insert
B. Update
C. Delete
D. Create
- 4) _____ SQL statement is use to delete column of table specified.
A. drop
B. update
C. alter
D. delete
- 5) The data held across the primary key column must be _____.
A. Unique
B. Repetitive
C. NULL
D. Simple
- 6) The _____ function returns an integer value corresponding to the UserID of the user currently logged in.
A. ROWID
B. USER
C. UID
D. ROWNUM
- 7) The _____ clause imposes a condition of the group by clause.
A. group by
B. Having
C. sub query
D. where
- 8) Functions that act on only one value at a time are called _____.
A. Scalar Function
B. Aggregate Function
C. Group Function
D. Multiple Row
- 9) Rollback query is belonging to _____ type of query.
A. TCL
B. DDL
C. DML
D. DCL
- 10) Which integrity constrains states that no primary key value can be null.
A. Entity
B. Referential
C. Domain
D. Simple

Q-2 Give short answers of the following questions: (Attempt TEN out of TWELVE)

20

- 1) Draw the structure of DBMS.
- 2) Define : tuple, attributes and Domain
- 3) What is relationship? List types of relationship.
- 4) Explain any one auto committed command in short.
- 5) How to destroy a table?

Seat No : _____

No. of Printed Pages:

- 6) What is the use of SELECT command?
- 7) What are the features of NULL value?
- 8) Explain concept of DUAL table.
- 9) Explain use of BETWEEN operator in concern with Rang searching.
- 10) What is subquery? Explain in brief.
- 11) Explain use of initcap() and substr() functions.
- 12) List all Scalar functions available in oracle.

- Q-3** **A** Explain the three-schema architecture for a Database Management System. **[5]**
 B Explain network data model. **[5]**

OR

- Q-3** **A** Explain concept and terminology of Relational data model. **[5]**
 B Explain classification of users of DBMS. **[5]**

- Q-4** **A** Explain various basic data types used in oracle. **[5]**
- B** Explain create table statement with its syntax and example. **[5]**

OR

- Q-4 A** What is DML? List and explain different types of commands under this category. **[5]**
B Explain various ways to insert records in a table. **[5]**

- Q-5**
- | | | |
|----------|---|------------|
| A | List all the Operators used in SQL and explain any one of them. | [5] |
| B | Write a note on UNIQUE key concept with example. | [5] |

OR

- Q-5**
- | | | |
|----------|--|-----|
| A | List all Pseudo columns and explain any three of them. | [5] |
| B | Explain the concept of CHECK constraint with example. | [5] |

- Q-6** Explain Numeric functions and Aggregate functions with appropriate syntaxes and examples. **[10]**

OR

- Q-6** Write note on: Sequence and View [10]
