SARDAR PATEL UNIVERSITY
B.C.A SEM:II (NC) Examination

US02CBCA06: Database Management Systems Using Open Office Base

DATE: 23/09/2022, Tuesday

TIME: 2:00 P.M TO 4:00 P.M

Maximum Marks: 70

Q:1 Multiple choice questions.

[10]

1. _____ Contain the Source of Each data Field value And The Frequency of its used.
(a) Data dictionary (b) Data Files (c) Information (d) Data manager
2. Who has the centralized control of data in DBMS?
(a) Programmer (b) Native user (c) Casual user (d) DBA
3. For what purpose form is designed?
(a) To Display Data (b) To enter data (c) To Create table (d) To view query result
4. Which one of the following is not a database?
(a) MySQL (b) Base (c) SQL Server (d) SpreadSheet
5. Which of the following is the default extension of Base Database file?
(a) .bdf (b) .odf (c) .odb (d) .dbf
6. _____ Returns the first count characters from the beginning of the String.
(a) SUBSTR() (b) CHAR() (c) RIGHT() (d) LEFT()
7. _____ Returns the absolute value of a number, removing a minus sign.
(a) ABS (b) MOD() (c) POWER() (d) SQRT()
8. _____ returns the square root.
(a) ROUND() (b) MOD() (c) POWER() (d) SQRT()
9. The result of a select query is generally represented as which of the following components?
(a) Table (b) Query (c) Constraint (d) Relation
10. Which of the following feature of Base is used to retrieve specific information from the database?
(a) Table (b) Query (c) Form (d) Report

Q:2

Fill in the Blanks and True/False.

[08]

1. The data contain in the database is both accurate and consistent is called ____.
2. DBMS stands for _____.
3. _____ function returns the day of the month.
4. SQL stands for _____.
5. Meaningful data is called DATABASE. [TRUE / FALSE]
6. Processed data is known as Decision. [TRUE / FALSE]
7. ASCII() returns the ASCII code of the first letter of the string. [TRUE / FALSE]
8. The Design View provides a minimal amount of guidance to create a query. [TRUE / FALSE]

Q:3

Answer the following questions. (Any ten)

[20]

1. What is DBMS? Give Example of DBMS.
2. Explain Feasibility study in brief.
3. Which is typical Operations Performed on database?
4. List down different Controls which are use to design form. Explain any one.
5. Write down steps for database creation.
6. What is sub form.
7. Explain SUBSTR() with example.
8. Explain FLOOR() with example.
9. Explain RTRIM() with example.
10. Which different ways to create a query?
11. Write steps to edit a Query.
12. Which operators are used to set criteria in query?

Q:4

Answer the following questions. (Any Four)

[32]

1. Explain structure of DBMS.
2. Explain advantages of DBMS in Detail.
3. What are forms? How to create forms. Write down their step.
4. What do you mean by relations in Base?
5. Explain any five Mathematical Function by taking appropriate example.
6. Explain any five String Function by taking appropriate example.
7. Write steps to create Report using Wizard in detail.
8. How to apply criteria using multiple fields in Query?
