SARDAR PATEL UNIVERSITY

BCA (Semester-III) On-Demand Examination – February 2026

[US03CBCA53] : Database Management System - II

Date: 9/2/2026 (Monday)

Time: 2.00pm to 5.00pm

Total Marks: 70

Note: Figure indicates at right is maximum marks for question.

Q -1 Select an appropriate option for the following statements. [10]

1. The different classes of relations created by the technique for preventing modification anomalies are called:
[a] Referential Integrity Constraint [b] Normal Form
[c] Functional Dependencies [d] None of these
2. Which normal form identifies functional dependencies?
[a] 1-NF [b] 2-NF
[c] 3-NF [d] None of these
3. The process of Normalization
[a] is automatic using a computer program [b] Require one to understand dependency between attributes
[c] is manual and require semantic information [d] All attributes are of uniform type
4. In PL/SQL, Code blocks start with a _____ Section.
[a] Begin [b] Exception
[c] Declare [d] Main
5. _____ puts a piece of information in the package buffer followed by an end of line marker.
[a] dbms_line [b] put_output
[c] dbms_output [d] put_line
6. The _____ section deals with handling of errors that arise during execution of the data manipulation statements, which makes up the PL/SQL code block.
[a] Exception [b] Declaration
[c] End [d] Error
7. _____ exception is raised when the data type or data size is invalid.
[a] Program_error [b] Value_error
[c] Type_invalid [d] None of these
8. Data stored in a cursor is known as _____.
[a] Implicit cursor [b] Active data set
[c] Current data set [d] None of these
9. A _____ can must have return statement.
[a] Function [b] Procedure
[c] Trigger [d] None of these
10. Procedure is stored in _____.
[a] Oracle Database [b] SGA
[c] Client Machine [d] None of these

[1]

[P.T.O]

Q-2 Give brief answer for the following questions. (Attempt any Ten) [20]

1. Write the purpose of Normalization.
2. What are the consequences of poor database design?
3. Explain 3NF.
4. Draw the basic structure for PL/SQL block.
5. What are the advantages of PL/SQL?
6. What is %type?
7. What is Cursor? Write the attributes of Explicit cursor.
8. Explain SELECT..INTO statement of PL/SQL.
9. What is Exception? Write advantages of Exception handling in PL/SQL.
10. List parameters of Procedure.
11. What is Package? List part of package.
12. Write syntax of Function.

Q-3

[A] Discuss 1st and 2nd forms of Normalization using appropriate example [05]

[B] Write a note on Transitive dependencies. [05]

OR

[A] Explain Normalization process. Compare 3NF with BCNF. [05]

[B] Explain Functional Dependencies with suitable example [05]

Q-4

[A] Discuss CASE statement with use, syntax and example. [05]

[B] Explain Iterative control with syntax and example. [05]

OR

[A] Write a brief note on PL/SQL block structure. [05]

[B] Write a note on PL/SQL Datatypes. [05]

Q-5 Explain how to declare, open, fetch and close the Cursor using example. [10]

OR

Q-5 List different Exceptions of Oracle and discuss any two of them using suitable example. [10]

Q-6

[A] Explain Procedure with syntax and example. [05]

[B] Using example, discuss different parameters used in Procedures. [05]

OR

[A] Through example, explain how to create a different type of Triggers? [05]

[B] Write a note on PL/SQL Package. [05]

(2)
