No. of printed pages: [2]

[120]

SARDAR PATEL UNIVERSITY
BCA Semester III Examination 2024
US03CBCA51: Object Oriented Programming - I
Date: 16-10-2024 Wednesday

Time: 02:00PM to 05:00PM

Marks 70

Q.1 (A) Give Answer of Following Multiple Choice Questions

[10]

- (1.) A _____ is a collection of objects of similar type.
(a) Data (b) Object
(c) Class (d) Function
- (2.) _____ is called the insertion or put to operator.
(a) & (b) <<
(c) >> (d) ::
- (3.) _____ is process by which objects of one class get the properties of other class.
(a) Inheritance (b) Polymorphism
(c) Data hiding (d) Encapsulation
- (4.) _____ function is used to copy one string into another string.
(a) strcpy() (b) stringcopy()
(c) strcp() (d) StrCopy()
- (5.) _____ is used to free/destroy the memory occupied by the objects.
(a) Constructor (b) Destructor
(c) Delete (d) None of Above
- (6.) _____ is a variable of type class.
(a) Static (b) Object
(c) Operator (d) Constant
- (7.) One base class & multiple derived classes means _____ inheritance.
(a) multiple (b) hierarchical
(c) multilevel (d) hybrid
- (8.) Which of the following function allows multiple lines of input through the keyboard?
(a) gets() (b) getline()
(c) getch() (d) Both (B) and (C)
- (9.) A pointer is
(a) A keyword used to create variables (b) A variable that stores address of an instruction
(c) A variable that stores address of other variable (d) All of the above
- (10.) Which one of the following operators cannot be overloaded?
(a) the function call () (b) +=
(c) >> (d)?:

(P.T.O.)

Q. 2 Answer the Following (Attempt Any Ten)

[20]

- (1.) Define inheritance as concept of OOP.
- (2.) List out types operator available in C++.
- (3.) List out any four-header file in C++.
- (4.) Explain cout in C++ with example.
- (5.) Explain cin in C++ with example.
- (6.) List all access specifiers and also write its use.
- (7.) What is the difference between private & protected members of the class?
- (8.) What is a virtual base-class? What is the use of it?
- (9.) What is inline function? Give an example of it.
- (10.) What is Operator Overloading?
- (11.) What is this pointer?
- (12.) What is stream?

[10]

Q. 3 (a.) Explain different data type available in C++.

(b.) What is C++? Explain structure of C++.

OR

(a.) Explain features (characteristics) of OOP in detail.

(b.) Explain the concept of class & object with example

Q. 4 (a.) Define array. Explain passing arrays to functions with an example

[10]

(b.) What do you mean by constructors? What is the use of constructors in C++?

OR

(a.) Explain destructors with an example.

(b.) Explain constructor overloading with example.

Q. 5 (a.) Explain multiple & multilevel inheritance with suitable example

[10]

(b.) Discuss inline functions with appropriate example

OR

(a.) Define inheritance. List all types of inheritance. Discuss the syntax of defining base-class & derived class.

(b.) Discuss briefly – virtual function.

Q. 6 (a.) Explain the restriction and limitations in overloading operator.

[10]

(b.) What is file mode? Describe the various file mode operations available.

OR

(a.) Describe the various classes available for file operations.

(b.) Explain binary operator overloading with example.
