SARDAR PATEL UNIVERSITY
S.Y.B.C.A (3rd Semester) (CBCS) Examination- 2025
US03BCA51: Object Oriented Programming- I

DATE: 6th October 2025, Monday

TIME: 02:00 P.M to 05:00 P.M

Total Marks: 70

Q:1 Multiple choice questions.

[10]

1. A _____ is a collection of objects of similar type.
A. Data B. Object C. Class D. Function
2. _____ means "To bind data & functions into a single unit".
A. Inheritance B. Polymorphism C. Data hiding D. Encapsulation
3. The header file _____ should be included that use input/output statements.
A. iostream B. stdio C. conio D. io
4. _____ is used to free/destroy the memory occupied by the objects.
A. Constructor B. Destructor C. Delete D. None of Above
5. _____ access specifier is default in class definition.
A. private B. protected C. public D. None of Above
6. For string manipulation _____ header file is included.
A. iostream.h B. ctype.h C. string.h D. conio.h
7. By default, main() in C++ returns _____.
A. void B. char C. int D. char*
8. Which of the following function allows multiple lines of input through the keyboard?
A. gets() B. getline() C. getch() D. Both (B) and (C)
9. Which one of the following operators can be overloaded?
A. :: B. New C. * D. Sizeof
10. Which one of the following operators cannot be overloaded?
A. the function call () B. += C. >> D. ?:

[P.T.O]

Q:2 Answer the following questions. (Any ten)

[20]

1. What is object – oriented programming?
2. Define class & object as concept of OOP.
3. List out any four header file in C++.
4. List all access specifiers and also write its use.
5. List all operations on Array.
6. List the characteristics of member function.
7. What is inline function? Give an example of it.
8. Define friend function & list its use.
9. What is the difference between private & protected members of the class?
10. What is this pointer?
11. What is stream?
12. List out the operators that cannot be overloaded using Friend function.

Q:3 A. Explain features (characteristics) of OOP in detail.

[05]

B. What is C++? Explain structure of C++.

[05]

OR

A. Explain different data type available in C++.

[05]

B. Explain different operator available in C++.

[05]

Q:4 A. Explain declaration and initialization of one dimensional array with example.

[05]

B. Explain destructors with an example.

[05]

OR

A. Explain declaration and initialization of two dimensional array with example.

[05]

B. What do you mean by constructors? What is the use of constructors in C++?

[05]

Q:5 A. Define inheritance. List all types of inheritance. Discuss the syntax of defining base-class & derived class.

[05]

B. Discuss inheritance in public mode & its effects on accessibility of base-class members.

[05]

OR

A. Discuss inheritance in private mode & its effects on accessibility of base-class members.

[05]

B. Discuss briefly – virtual function.

[05]

Q:6 A. Explain binary operator overloading with example.

[05]

B. Explain read(),write(),seek(),close()

[05]

OR

A. What is file mode? Describe the various file mode operations available.

[05]

B. Explain unary operator overloading with example.

[05]

(2)
