

[114]

SARDAR PATEL UNIVERSITY, VALLABH VIDYANAGAR

EXTERNAL EXAMINATION

BCA SEMESTER-III

Subject Code: US03BCA23

Subject Title: Object Oriented Programming - I

Date: 24-11-2021,

Time: 03:00pm to 05:00pm

Marks: 70

Wednesday

Q.1 Multiple Choice Questions**[10]**

1. In _____ data is hidden and cannot be accessed by external functions.
(A) OOP (B) POP (C) SOP (D) None
2. A _____ is a collection of objects of similar type.
(A) Data (B) Object (C) Class (4) Functions
3. _____ means ability to take more than one form.
(A) Polymorphism (B) Inheritance (C) Encapsulation (D) Abstraction
4. The header file _____ should be included that use input/output statements
(A) Stdio (B) conio (C) iostream (D) io
5. _____ function is used to copy one string into another string.
(A) Strcpy() (B) strcpy() (C) Stringcpy (D) StringCopy
6. _____ access specifier is default in class definition.
(A) Public (B) Protected (C) Private (D) None
7. Creating a new class using one or more existing classes is known as _____.
(A) Inheritance (B) Data Hiding (C) Polymorphism (D) Encapsulation
8. In case of multipath inheritance, problem of duplicate data-members is resolved using _____ keyword.
(A) Abstract (B) Constant (C) Virtual (D) Default
9. The correct function name for overloading the addition (+) operator is _____.
(A) operator+ (B) operator(+) (C) +operator (D) operator:+
10. Which one of the following operators can be overloaded?
(A) :: (B) * (C) New (D) ?.

Q.2 Fill in the Blanks and True False**[08]**

1. _____ is known as scope resolution operator.
2. _____ is called as extraction or get from operator.
3. For string manipulation _____ header file is included.
4. _____ constructor contains an object as argument.
5. One base class & multiple derived classes mean hierarchical inheritance. State True or False.
6. Creating a new class using one or more existing classes is known as encapsulation. State True or False.
7. A pointer is a variable that stores address of other variable. State True or False
8. ?: operators can be overloaded.

①

P.T.O.

Q.3 Short Question (Attempt Any 10 out of 12)

[20]

1. Define class & object.
2. Define An encapsulation.
3. What is an inheritance? List out its types only.
4. Define string and write how to declare string?
5. List out all access specifiers.
6. Write down characteristics of constructor.
7. Define friend function.
8. Define virtual function.
9. What is inline function?
10. What is Operator Overloading?
11. List some of the rules for overloading operator.
12. List the operators that can't be overloaded.

Q.4 Long Questions Answer (Attempt Any four out of Eight)

[32]

1. Differentiate Object Oriented Programming & Structured Oriented Programming.
2. Explain different types of operators with example.
3. Define array. Explain passing arrays to functions with an example
4. What do you mean by constructors? Give example of it. What is the use of constructors in C++?
5. Define inheritance. List all types of inheritance. Explain any three of them.
6. Discuss briefly – virtual function.
7. Explain binary operator overloading with example.
8. Explain unary operator overloading with example.
