

SARDAR PATEL UNIVERSITY
BCA EXAMINATION, III SEM

Date : 14th NOV 2017, Tuesday

Time : 02:00pm To 05:00pm

Session : Evening

Sub: Relational Database Management System – I

Course No : US03CBCA01

Total marks : 70

Q-1 Multiple Choice Question

[10]

- i) Actual value of a column is also called _____
a) Tuple b) Derived Attribute c) Attribute d) Domain
- ii) How many conceptual schemes are available per database?
a) One b) Two c) Three d) Four
- iii) Which constraint is used to respect the type and representation of its attributes
a) Domain b) References c) Entity d) Simple
- iv) _____ query statement is auto committed query ?
a) Insert b) Drop c) update d) Grant
- v) _____ SQL statement is use to modify data type of any column of table.
a) Change b) Update c) Alter d) Create
- vi) _____ SQL PLUS command is use to execute a command file.
a) Connect b) Save c) start d) spool
- vii) A _____ value can be inserted into the columns of any data type.
a) Null b) Unique c) Not Null d) Index
- viii) Table level constraints are stored as a part of the _____ table definition.
a) Primary b) Global c) Temporary d) Local
- ix) _____ clause imposes a condition of the group by clause.
a) Group by b) Sub query c) Having d) Where
- x) The address field of an index is called _____
a) Row id b) Column id c) View d) Index

Q-2 Short Answer attempt any ten (Each carry 2 marks)

[20]

- i) Draw the three level architecture of DBMS.
- ii) Define domain and relationship.
- iii) Define attribute and tuple.
- iv) Explain Order By clause.
- v) List auto committed commands and explain any one with its syntax and example
- vi) Explain ED and set Linesize of SQL*PLUS command.
- vii) Differentiate Null value and an Empty string
- viii) What is Column level constraints?
- ix) Explain DECODE function with simple example.
- x) What is privilege? List the type of Privileges.
- xi) What is synonyms?
- xii) How can the Grant given on a object?

- Q-3**
- a) Explain different types of architecture.
 - b) List out Codd rules and explain any five.

[05]

[05]

OR

- Q-3**
- a) What is E-R Diagram? Draw the different symbol of ER Diagram.
 - b) Explain Relational Data model

[05]

[05]

- Q-4**
- a) Explain various ways to change structure of table using alter statement..
 - b) What is DML? List types of statement of it and explain any two.

[05]

[05]

OR

- Q-4 a) Explain various ways to insert records in a table [05]
b) Explain how to filtering the data in ORACLE. Explain with proper syntax and example [05]

Q-5 Explain Primary and Foreign key constraint with appropriate example. [10]

OR

Q-5 List all scalar functions available in SQL and explain any three main function with its sub functions in detail. [10]

- Q-6 a) What is transaction processing ? Explain all TCL statements. [05]
b) What is index? List types of index and explain any one with example. [05]

OR

- Q-6 a) What is view? Why it is created, explain it syntax & example. [05]
b) Explain referencing a sequence with the example. [05]
