

Seat No : _____

No. of Printed Pages : 02

[41]

SARDAR PATEL UNIVERSITY
BCA NC EXAMINATION, III SEM

Date : 11/02/2020, Tuesday.

Time : 10.00 AM to 1.00 PM

Session : Morning

Sub: Relational Database Management System – I

Course No : US03CBCA01

Total marks : 70

Q – 1 Multiple Choice Question

[10]

- i) Which of the following is not three – schema architecture for a database _____.
a) Hierarchical b) Physical c) Network d) Relational
- ii) Relation can be represented as
a) Record b) Data c) Row d) Table
- iii) Which constraint is used to respect the type and representation of its attributes
a) Domain b) References c) Entity- d) Simple
- iv) _____ query statement is auto committed query ?
a) Insert b) Drop c) update d) Grant
- v) _____ SQL statement is use to modify data type of any column of table.
a) Change b) Update c) Alter d) Create
- vi) _____ SQL PLUS command is use to execute a command file.
a) Connect b) Save c) start d) spool
- vii) A _____ value can be inserted into the columns of any data type.
a) Null b) Unique c) Not Null d) Index
- viii) Table level constraints are stored as a part of the _____ table definition.
a) Primary b) Global c) Temporary d) Local
- ix) _____ clause imposes a condition of the group by clause.
a) Group by b) Sub query c) Having d) Where
- x) The address field of an index is called _____.
a) Row id b) Column id c) View d) Index

Q – 2 Short Answer attempt any ten (Each carry 2 marks)

[20]

- i) Draw the three level architecture of DBMS.
- ii) Define domain and tuple.
- iii) Define attribute and relationship.
- iv) Explain Order By clause.
- v) List auto committed commands and explain any one with its syntax and example
- vi) Explain ED and set Linesize of SQL*PLUS command.
- vii) Differentiate Null value and an Empty string
- viii) What is Column level constraints?
- ix) Explain DECODE function with simple example.
- x) What is privilege? List the type of Privileges.
- xi) What is synonyms?
- xii) How can the Grant given on a object?

Q – 3 a) Explain three different data model

[10]

OR

Q – 3 a) What is E-R modeling? Explain in detail with diagram.

[10]

(P.T.O)

- Q – 4 a) Explain various ways to change structure of table using alter statement.. [05]
 b) What is DML? List types of statement of it and explain any two. [05]

OR

- Q – 4 a) Explain various ways to insert records in a table [05]
 b) Explain how to filtering the data in ORACLE. Explain with proper syntax and example [05]

- Q-5 a) Explain Primary constraint with appropriate example. [06]
b) Explain NVL & DECODE with syntax and example [04]

OR

- Q-5 a) Explain Foreign key constraint with appropriate example. [06]
b) Explain the concept of data constraints. [04]

- Q – 6 a) What is transaction processing ? Explain all TCL statements. [05]
 b) What is index? List types of index and explain any one with example. [05]

OR

- Q-6 a) What is view? Why it is created, explain it syntax & example. [05]
b) Explain referencing a sequence with the example. [05]
