**SARDAR PATEL UNIVERSITY**

**B.C.A. [SEMESTER- 4] || [April -2026]**

**US04CBCA23: Object Oriented Programming - II**

**Date: 02-04-2026, Thursday**

**Time: 02.00 pm – 05.00 pm**

**Marks: 70**

**Q-1**

**Select the correct option from the following questions.**

(10)

- 1) \_\_\_\_\_ is one of Java features that enables java program to run anywhere anytime.

a) Object Oriented                      b) Multithreaded  
c) Platform Independent                d) Dynamic & Extensible
- 2) Which statement is used to terminate loop early?

a) terminate                  b) break                  c) continue                  d) skip
- 3) \_\_\_\_\_ inheritance is not supported by Java.

a) Multiple                  b) Hybrid                  c) Multilevel                  d) Hierarchical
- 4) \_\_\_\_\_ is default access specifier in Java

a) private                  b) public                  c) protected                  d) friendly
- 5) \_\_\_\_\_ is a special method in java that enables an object to initialize itself when it is created.

a) constructor                  b) destructor                  c) static                  d) final
- 6) Character streams can be used to read and write \_\_\_\_\_ Unicode characters.

a) 4-bit                  b) 16-bit                  c) 2-bit                  d) 8-bit
- 7) All syntax errors are known as \_\_\_\_\_ errors.

a) Exception                  b) Logical                  c) Compile-time                  d) Run-time
- 8) The \_\_\_\_\_ parameter is used to specify the applet class name.

a) classname                  b) name                  c) codebase                  d) code
- 9) \_\_\_\_\_ is a multi-line edit control.

a) TextArea                  b) TextField                  c) Button                  d) Label
- 10) JDBC application must import \_\_\_\_\_ package.

a) sql                  b) io                  c) util                  d) event

**Q-2**

### Short Questions (Attempt any Ten)

(20)

- 1) Write syntax of any one of the following loops - while, for, do...while.
- 2) Write down the rules for variable naming.
- 3) What is JVM ( Java Virtual Machine)?
- 4) Define Class. How does it accomplish data hiding?
- 5) What is the meaning of the *abstract* keyword?

①

[P To]

1

- 6) Define method overloading.
- 7) Explain any two string methods.
- 8) Give examples of Run-time error.
- 9) List out Java API packages.
- 10) Define 1) Event 2) Event Listener
- 11) List types of drivers used in JDBC.
- 12) Write difference between java applet and java application program.

- Q-3**    **A**    List out decision making statements available in java. Explain with example.    (05)
- B**    Explain scope of variable in Java.    (05)

OR

- Q-3**    **A**    What is Java? Explain the features of Java.    (05)
- B**    Explain structure of Java program with proper example.    (05)

- Q-4**    **A**    Define inheritance. Explain different forms of inheritance.    (05)
- B**    What is a constructor? What are its special properties? Give example.    (05)

OR

- Q-4**    **A**    Explain super and final keyword with example.    (05)
- B**    Describe various forms of implementing interface. Give an example of Java code for each case.    (05)

- Q-5**    **A**    Write a short note on Character Stream Classes.    (05)
- B**    What is Exception? Explain the syntax of try and catch block with example.    (05)

OR

- Q-5**    **A**    What is package? What are the benefits of package? Explain Java API package.    (05)
- B**    Describe the concept of stream in detail.    (05)

- Q-6**    Write a short note on following components. Give example of each.    (10)
- (i) Button                      (ii) Checkbox

OR

- Q-6**    Explain Applet life cycle in detail with example.    (10)

—X—
