

Q.1 Multiple choice questions:

[10]

- Which statement is used to skip the loop and continue with the next iteration?
a) continue b) terminate
c) skip d) break
- The process of converting one data type to another is called _____.
a) Translating b) Casting
c) Compiling d) Declaring
- _____ is one of the Java features that enables a Java program to run anywhere anytime.
a) Object-Oriented b) Multithreaded
c) Platform-Independent d) Dynamic & Extensible
- What keyword is used in Java to define a constant?
a) static b) final
c) abstract d) private
- The subclass constructor uses the _____ keyword to invoke the constructor of the super class.
a) super b) Final
c) static d) public
- "Use of undeclared variables" is the _____ type of error.
a) Run-time b) Exception
c) Logical d) Compile-time
- _____ is caused when a conversion between string and number fails.
a) NullPointerException b) NumberFormatException
c) IOException d) SecurityException
- Through the applet life cycle _____ state occurs only once.
a) Running b) Idle
c) Born d) None of these
- In _____ component we can select multiple items.
a) Option Button b) Choice
c) List d) None of these
- _____ operator is used to construct conditional expression.
a) Dot(.) b) instanceof
c) Ternary(?:) d) None

Q.2 (A) Fill In the blanks.

[08]

1. JVM stands for _____.
2. _____ keyword is used to inherit a class in java.
3. _____ package is used for creating and implementing applets.
4. JDBC application must import _____ package.

(B) TRUE/FALSE

1. Java compiler translates source code into bytecode.
2. constructor is a special method in java that enables an object to initialize itself when it is created.
3. "Converting invalid string to a number" is the compile time error.
4. If we implements ActionListener in our program, then we must override actionPerformed() method.

Q.3 Attempt any *Ten* out of *Twelve*.

[20]

1. What is JVM (Java Virtual Machine)?
2. Draw the Java program structure.
3. List out Java API and define any one of it.
4. Write short note on method overloading.
5. Write short note on method overriding.
6. Define interface. Write the syntax for implementing an interface in a class.
7. List out the different types of exception.
8. List the methods of Reader or Writer class.
9. Give examples of the Run-time error.
10. List out methods of MouseListener.
11. Explain types of drivers used in JDBC.
12. List out the process of applet life cycle.

Q.4 Attempt any *Four* out of *Eight*.

[32]

1. What is java? Explain features of java. Describe the java environment.
2. Explain looping statement. Explain break and continue.
3. What is constructor? Explain types of constructor with example.
4. Explain different types of inheritance with example.
5. List out any four methods of String class by giving an example.
6. What is exception? Explain the syntax of try block and catch block with an example.
7. Explain Label and Button control in Applet with example.
8. Explain TextField and ChechBox control in Applet with example.
