

[67]

SARDAR PATEL UNIVERSITY EXTERNAL EXAMINATION

B.C.A(SEM-IV)

US04CBCA01: Relational Database Management System-II

13-8-2019, Tuesday

Maximum Marks : 70

Time: 2:00 To 5:00 Pm

Q-1 Answer the following questions.

[10]

1. The process of normalization
 - (a) Is automatic using a computer program.
 - (b) Requires one to understand dependency between attributes
 - (c) Is manual and requires semantic information
 - (d) Is finding the key of a relation
2. Which of the following is not an anomaly?
 - (a) INDEX
 - (b) INSERT
 - (c) UPDATE
 - (d) DELETE
3. The _____ section is compulsory in PL/SQL block.
 - (a) exception
 - (b) begin
 - (c) declare
 - (d) None of these
4. The _____ statement changes the flow of control within PL/SQL block.
 - (a) goto
 - (b) loop
 - (c) end loop
 - (d) repeat
5. Data stored in cursor is known as _____.
 - (a) Current data set
 - (b) Active data set
 - (c) Main data set
 - (d) Implicit data set
6. Which of the following is not a cursor attribute?
 - (a) %rowtype
 - (b) %found
 - (c) %rowcount
 - (d) %isopen
7. _____ exception is raised when the data type or data size is invalid.
 - (a) Program_error
 - (b) Value_error
 - (c) Type_invalid
 - (d) None of these
8. A _____ is an ORACLE object which holds other object within it .
 - (a) Procedure
 - (b) Function
 - (c) Package
 - (d) Distributed Description Language
9. A _____ trigger is fired each time a row in the table is affected by the triggering statement.
 - (a) Row
 - (b) Statement
 - (c) After
 - (d) Before
10. _____ type of parameter used to send values & get values from the stored procedures.
 - (a) IN
 - (b) OUT
 - (c) IN OUT
 - (d) none of above

Q-2 Answer the following questions.(any ten) [20]

1. List out the consequences of poor database design.
2. What is Transitive Dependencies explain with Example.
3. Differentiate 3NF and BCNF.
4. Define: Variable and Constant
5. List various data types available in PL/SQL.
6. Explain Case statement in brief.
7. Differentiate between implicit cursor and explicit cursors.
8. Explain cursor FOR LOOP.
9. Explain oracle's default exception handling strategy.
10. List out the parameters of Function.
11. How dose oracle engine execute procedures or functions?
12. Give the different between Before Trigger and After Trigger.

Q-3[A] What is Normalization? Why it is carried out? Explain First Normal form by taking suitable example. [6]

[B] Explain the consequences of poor database design. [4]

OR

Q-3[A] Explain 1st, 2nd and 3rd normal form in detail by taking suitable example. [6]

[B] Explain Functional Dependencies. [4]

Q-4 What is PL/SQL? Explain the advantages and disadvantages of PL/SQL. [10]
Draw and explain the structure of PL/SQL block.

OR

Q-4 Explain Conditional, Iterative and Sequential control with syntax and example. [10]

Q-5[A] What is Exception? Explain user defined exceptions with syntax and example. [6]

[B] List and explain implicit cursor attributed with suitable example. [4]

OR

Q-5[A] Explain following statements for explicit cursors : (Each of 2 marks) [6]
a) open b) close c) fetch

[B] List oracle's NAMED EXCEPTION HANDLERS with description. [4]

Q-6[A] Explain advantages of using a Function. [6]

[B] Explain different types of oracle trigger. [4]

OR

Q-6[A] Explain the syntax of creating trigger with example. [6]

[B] Explain the component of oracle package with example. [4]
