[26/A-18]

Sardar Patel University

S.Y.B.C.A. (4th Semester- NC) Examination, Sep-2020

US04CBCA01 || Relational Database Management System-II

Date: 08-09-2020

Time: 03.00 pm to 5.00 pm

Total Marks: 70

Q:1 Multiple choice questions.

[10]

- 1 Which normal form identifies transitive dependencies
a) 1-NF b) 2-NF c) both a & b d) 3-NF
- 2 Every time attribute A appears, it is matched with the same value of attribute B, but not the same value of attribute C. Therefore, it is true that:
a) $A \rightarrow B$ b) $A \rightarrow C$ c) $A \rightarrow (B, C)$ d) $(B, C) \rightarrow A$
- 3 In which control structure, no need to declare to memory variable?
a) if b) while c) do..while d) for
- 4 The _____ attributes is used to declare a variables based on definition of columns in a table.
a) %type b) %rowtype c) %row d) rowid
- 5 _____ puts a piece of information in the package buffer followed by an end of line marker.
a) dbms_line b) put_output c) dbms_output d) put_line
- 6 Data stored in a cursor is known as _____.
a) Active Data Set b) Implicit cursor c) current data set d) none of these
- 7 _____ can be declared by user for the queries that return more than one row
a) Implicit Cursor b) User defined Functions
c) User defined Procedures d) Explicit Cursor
- 8 We can pass parameter to procedure in how many ways.
a) One b) Two c) Three d) Four
- 9 Which command to execute the procedure?
a) EXECUTE procedure_name b) EXEC procedure_name
c) a & b both d) none of this
- 10 _____ type of parameter used to send values & get values from the stored procedures.
a) IN b) OUT c) IN OUT d) none of above

[P.T.O]

Q:2 Fill in the blanks and True-False

[08]

1. _____ normal form identifies functional dependencies.
2. The _____ statement changes the flow of control within PL/SQL block.
3. Fetch statement retrieves _____ rows at a time.
4. A _____ is an oracle object, which holds other objects in it.
5. Index is one type of an anomaly. **[TRUE/ FALSE]**
6. An exception section is compulsory in PL/SQL block. **[TRUE/ FALSE]**
7. value_error exception is raised when the data type or data size is invalid.
[TRUE/ FALSE]
8. Procedures are stored in Oracle database. **[TRUE/ FALSE]**

Q:3 Short questions. (Attempt any 10)

[20]

1. List out the consequences of poor database design.
2. What is the need of normalization ?
3. What do you mean by lossless join decomposition?
4. Write Advantages of PL/SQL.
5. Explain Case statement in brief.
6. Define: Variable and Constant
7. Explain in brief: SQLERRM.
8. List Implicit cursor attributes.
9. Explain SELECT..INTO statement available in PL/SQL.
10. List out the parameter of Procedure.
11. What is Trigger? List types of trigger.
12. What is Package? List part of package

Q:4 Answer the following questions in detail. (Attempt any 4)

[32]

1. What is Normalization? Explain 1st normal form, 2nd normal form and 3rd normal form with example.
2. Draw and explain PL/SQL block structure.
3. Write note on pre-determined internal pl/sql exceptions with example.
4. Explain Function with syntax and example.
5. Explain consequences of poor database design and Functional Dependencies.
6. Explain Iterative control and sequential control with syntax and example.
7. List and explain explicit cursor attributed with suitable example.
8. Explain Trigger with syntax and example.
