SARDAR PATEL UNIVERSITY
B. C. A. (NEP) (Semester 5) Examination – 2026
US05MABCA02: Visual Programming

Date: 10/02/2026, Tuesday
Time: 10:00 AM to 12:30 PM

Total: 50 Marks

Q-1 MCQs

[10]

- 1 Which component of .NET is responsible for converting MSIL to native code at runtime?
A) CLR B) JIT Compiler C) Assembly Loader D) Metadata Reader
- 2 What is type casting?
A) Copying a variable B) Converting one data type to another
C) Removing a variable D) Comparing two data types
- 3 What is 'Unboxing'?
A) Converting string to number B) Converting value type to reference type
C) Converting reference type back to value type D) Converting float to double
- 4 Which conditional statement allows checking multiple conditions at once?
A) If...Then B) Select Case C) While D) For Each
- 5 A procedure that returns a value is declared using which keyword?
A) Sub B) Function C) ReturnSub D) ValFunc
- 6 Which event is triggered when a Windows Form is first loaded?
A) Click B) Initialize C) Load D) Start
- 7 The Tick event is found only in which object?
A) Form B) Button C) TextBox D) Timer
- 8 Which control is used to display non-editable text on a form?
A) TextBox B) GroupBox C) ListBox D) Label
- 9 Which of the following is *not* a component of ADO.NET?
A) DataSet B) DataAdapter C) SqlConnection D) ODBCReader
- 10 What control is used to display tabular data in Windows Forms?
A) ListBox B) ComboBox C) TextBox D) DataGridView

[P.T.O]

- Q-2 Discuss the role of the Just-In-Time (JIT) compiler within the .NET runtime. [10]
OR
- Q-2 Explain the different types of operators available in VB.NET with examples of each category. [10]
- Q-3 Explain the principles of object-oriented programming in the context of VB.NET. [10]
OR
- Q-3 Explain parameter passing techniques (ByVal and ByRef) in VB.NET procedures. [10]
Create a program to illustrate both methods and show the difference in output.
- Q-4 Explain various basic controls such as Button, CheckBox, RadioButton, ComboBox, and TextBox to create a dynamic user interface with example. [10]
OR
- Q-4 Explain the concept of exception handling in Windows Forms applications with specific reference to structured exception handling using try...catch...finally. [10]
- Q-5 Define ADO.NET. Also explain the connected architecture of ADO.NET. [10]
OR
- Q-5 What are the advantages of using reports in VB.NET applications? Write a step-by-step process to design a printable report using Microsoft Report Viewer in VB.NET. [10]
