

SEAT No. _____

[26]

No. of printed pages: 2

SARDAR PATEL UNIVERSITY
T.Y.B.C.A. SEMESTER - V (CBCS) EXAMINATIONS - 2021
US05CBCA23: SOFTWARE ENGINEERING

Thursday, 09th Sept., 2021

Time: 10:00 am TO 12:00 noon

09/09/2021

Max. Marks: 70

Q-1 Multiple Choice Questions.

[10]

1. _____ is the collection of computer programs, procedures and data.
A. Hardware
B. Software
C. Network
D. Engineering
2. _____ is the simplest and most widely used software development model.
A. Spiral
B. Prototype
C. Iterative enhancement
D. Waterfall
3. A high quality SRS reduces the development _____.
A. Time
B. Customer requirements
C. Cost
D. Quality
4. COCOMO stands for:
A. Construction Cost Model
B. Constructive Cost Model
C. Constructive Code Model
D. Calculated Cost Model
5. KDLOC means _____.
A. Kilogram Developed Line of Code
B. Kilogram Delivered Local Code
C. Thousands Delivered Local Code
D. Thousands Delivered Line of Code
6. Structured design methodology tries to reduce _____.
A. Cost
B. Time
C. Cohesion
D. Coupling
7. Number of subordinates associated with given module is known as _____.
A. Fan-out
B. Fan-in
C. Dependency
D. Module
8. Structured programming is often called _____ programming.
A. goto-less
B. object oriented
C. procedural
D. None of these
9. Which static method is used for verify the programs?
A. Review
B. Automated cross checking
C. Code reading
D. None of these
10. A failure is produced only when there is a _____ in the system.
A. error
B. bug
C. fault
D. problem

(P.T.O.)

①

Q-2 Fill in the Blanks and True / False.

[08]

1. The coding should follow rules of _____.
2. _____ requires major efforts.
3. An SRS provides a reference for _____ of the final product
4. The medium size projects are also known as _____ projects.
5. Architecture is a component of Object oriented software engineering.
6. Most common method for designing algorithm is step wise refinement.
7. Comments for a module are often called prologue for the module.
8. The single-entry, single-exit constructs are also called iteration constructs.

Q-3 Short Questions (Attempt any ten).

[20]

1. Define: Software, Software Engineering
2. Write a short note on requirement analysis phase.
3. List down characteristics of software process.
4. Explain Structured English in brief.
5. Explain Partitioning.
6. Write a short note on Time sheets.
7. Define: Coupling and Cohesion
8. Differentiate between System design and Detailed design.
9. List the levels of Cohesion.
10. Draw the diagram of levels of testing.
11. Define Error, fault
12. List advantages of Automated Testing.

Q-4 Long Questions (Attempt any four)

[32]

1. Explain phases of software development.
2. Explain waterfall model.
3. What is SRS? Explain components of SRS.
4. Explain COCOMO Model.
5. Write note on: Coupling
6. List and discuss the basic principles of design in detail.
7. What is testing? Explain the levels of testing.
8. Explain coding approach and programming style.
