

[79/A-14]

Seat No: _____

No. of printed pages :02

SARDAR PATEL UNIVERSITY
BCA (Semester-V) Examination November - 2021

US05CBCA23 (Software Engineering)

Date : 24 - 11 - 2021, Time : 12:00 p.m to 02:00 p.m
Wednesday

Total Marks : 70

Q.1 Multiple Choice Questions.

[10]

1. _____ is the collection of Computer Program, procedures and data.
A. Hardware B. Software C. Network D. Engineering
2. Which phase is required to understand the problem?
A. System Design B. Requirement Analysis C. Testing D. Coding
3. _____ is the second step of design phase.
A. Design Analysis B. System Design C. Black box D. Detail Design
4. COCOMO stands for:
A. Construction Cost Model B. Constructive Cost Model
C. Constructive Code Model D. Calculated Cost Model
5. An SRS provides a reference for _____ of the final product.
A. Validation B. Xerox copy C. Verification D. Quality
6. The medium size projects are also known as _____ projects
A. Organic B. Embedded C. Semidetached D. Run away
7. Which of the following is a tool in design phase?
A. Abstraction B. Refinement C. Information Hiding D. All of them
8. Which one is the key term used in design of a system?
A. Module B. Data C. Process D. None
9. In structured design methodology the hierarchy of modules is represented by the _____.
A. flow chart B. PERT chart C. Gant chart D. structure chart
10. Structured programming is often called _____ programming
A. goto-less B. object oriented C. procedural D. None of these

Q.2 Fill in the Blanks and True or False.

[08]

1. The coding should be follow rules of _____.
2. SQAP means _____.
3. PDL stands for _____.
4. A failure is produced only when there is a _____ in the system.
5. Testing part requires major efforts. (True / False)
6. The Gantt chart is used for Earn value method to display activities. (True/False)
7. Structured design methodology tries to reduce coupling. (True / False)
8. Code reading is the reverse of testing phase. (True / False)

[P.T.O]

Q.3 Answer the Following in brief. (Attempt Any 10)

[20]

1. Define : A. Software B. Software Engineering
2. List down characteristics of software process.
3. Write a short note on requirement analysis phase.
4. Justify the following.. "A high quality SRS is prerequisite to high quality software"
5. Explain Partitioning in brief.
6. Explain Risk management.
7. Differentiate between Top-down and Bottom-up approaches.
8. Define: A. Module B. Modular System
9. Explain in brief Design walkthrough.
10. Write at least 2 differences between functional and structural testing.
11. What is code reading? Explain in brief.
12. Define : A. Error B. failure.

Q.4 Answer the Following. (Attempt Any 4)

[32]

1. Explain waterfall model.
2. Explain phases of software development.
3. What is SRS? Explain characteristics, needs and Components of SRS.
4. Explain COCOMO Model.
5. What is system design? Explain how coupling and cohesion used.
6. Explain the verification techniques for Detailed Design.
7. Explain coding approach and programming style.
8. What is testing? Explain levels of testing using diagram
