

[20]

SARDAR PATEL UNIVERSITY
T.Y.B.C.A. (SEM-VI) Examination July – 2021
US06DBCA21 : Python Programming

Date: 19-07-2021

Time: 10-00 to 12-00 P.m.

Total Marks : 70

[10]

Q.1 Multiple choice questions:

- Which character is used in Python to make a single line comment?
a. /
b. //
c. #
d. !
- Which of the following operators is the correct option for power (a,b)?
a. a ^ b
b. a ** b
c. a ^^ b
d. a ^ * b
- Which statement is used to check multiple conditions in Python?
a. Else if
b. Elseif
c. Elif
d. None of these
- In which Removes all elements of dictionary dict.
a. dict.clear()
b. dict.copy()
c. dict.get()
d. dict.items()
- In which following operation of an array
a. Index
b. matrix
c. traverse
d. slicing
- Suppose B is a subclass of A, to invoke the __init__ method in A from B, what is the line of code you should write?
a. A.__init__(self)
b. B.__init__(self)
c. A.__init__(B)
d. B.__init__(A)
- Which of the following best describes polymorphism?
a. Ability of a class to derive members of another class as a part of its own definition.
b. Means of bundling instance variables and methods in order to restrict access to certain class members.
c. Focuses on variables and passing of variables to functions.
d. Allows for objects of different types and behavior to be treated as the same general type.
- To delete a file, you must import the OS module and run its _____ function.
a. os.remove()
b. os.delete()
c. os.exists()
d. os.truncate()
- To open a file "add.txt" for writing, we use _____.
a. f = open("add.txt", "r")
b. f = open("add.txt", "w")
c. f = open(file = "add.txt", "r")
d. f = open(file = "add.txt", "w")
- To read the next line of the file from a file object f, we use _____.
a. f.readline()
b. f.readlines()
c. f.read()
d. f.read(2)

(1)

(P.T.O.)

Q.2 (A) Fill In the blanks.

[08]

1. _____ is the correct extension of the Python file.
2. _____ function give the total length of list.
3. A single subclass derives from a single superclass is _____ level inheritance.
4. _____ function is used to write all the characters in file.

(B) TRUE/FALSE

1. Python is a widely used general-purpose, High Level programming.
2. Strings are immutable in Python, which means a string cannot be modified.
3. Object represents an entity in the real world with its identity and behavior.
4. "w" mode of file handling will append contents to the end of the file.

Q.3 Attempt any *Ten* out of *Twelve*.

[20]

1. Discuss a brief history of Python.
2. List the rules for declaration of Variables in Python.
3. Explain input() function in brief.
4. What is tuple? How to accessing of tuple in detail.
5. What is dictionary? How to updating dictionary in detail.
6. What is python JSON ? Explain with Example.
7. Explain: *args, **kwargs
8. List any four types of error in python.
9. Differentiate method overloading and method overriding.
10. Explain in short: fetchone()
11. How to create a connection?
12. How to create a new file in python?

Q.4 Attempt any *Four* out of *Eight*.

[32]

1. Explain the features and applications of Python in detail.
2. Write a detailed note on User Input and Output in Python in detail. Also explain decision making and branching in Python.
3. Explain list and set in python with example.
4. What is String? Explain string built in function.
5. What is inheritance? Explain types of inheritance with example in python.
6. Write a detailed note on classes, objects and constructor in python.
7. Explain file handling functions with example in detail.
8. Explain mysql database connection in python and discuss about types of query.
