a. indefinite b. discriminant c. definite d. indeterminate
- 5 Which of the following is not used as loop in Python?
a. for loop b. while loop c. do-while loop d. None of the above
- 6 Which of the following statements is used to create an empty set?
a. {} b. set() c. [] d. ()
- 7 _____ represents an entity in the real world with its identity and behavior.
a. A method b. An object c. A class d. An operator
- 8 _____ is used to create an object.
a. class b. constructor c. User-defined functions d. In-built functions
- 9 To open a file "add.txt" for writing, we use _____.
a. f = open("add.txt", "r") b. f = open("add.txt", "w")
c. f = open(file = "add.txt", "r") d. f = open(file = "add.txt", "w")
- 10 Which mode of file handling write() function will append contents to the end of the file ?
a. r b. w c. x d. a

Q.2 Fill in the Blanks and True or False.

[08]

1. _____ developed the Python language.
2. _____ Removes all elements of dictionary dict.
3. The assignment of more than one function to a particular operator is _____.
4. To create a new file in Python, we use the _____ method.
5. Identifier is start with & (ampersand) then it indicates it is private. (True / False)
6. The most basic data structure in python is Sequence. (True / False)
7. Accept is not an exception handling keyword in Python? (True / False)
8. Write () function is used to write all the characters. (True / False)

Q.3 Answer the Following.(Any 10)

[20]

1. List the rules for declaration of Variables in Python.
2. Explain input() function in brief.
3. List out Features of Python.
4. Define tuple.
5. What is dictionary? How to updating dictionary in detail.
6. Len () function of string with syntax, use and example.
7. Define: Function
8. Define method overloading.
9. Explain user defined exception in python with example.
10. How to close a file? Explain in short.
11. How to create a new file in python?
12. How create MYSQL database through python?

Q.4 Answer the Following.(Any 4)

[32]

1. Explain the applications and Programming Structure of Python in detail.
2. List and explain Operators of Python in detail.
3. Explain following functions with syntax, use and example.
a) Findall() b) Search() c) Sub() d) upper()
4. What is Array? Explain Array elements with example.
5. Explain Function in python in detail with example.
6. Explain any five error types with example.
7. Explain Insert and Update operation with example.
8. Write a note on read() function.
