B. while loop
C. do-while loop
D. None of the above

Q-2 Give answer in short. (ANY TEN)

[20]

1. Explain in short: comments in Python.
2. List the rules for declaration of Variables in Python.
3. Explain with an example: input() function.
4. Define dictionary. Give one example.
5. Differentiate between List and Tuple.
6. Define set. Give one example.
7. What is inheritance? List types of inheritance supported by python.
8. Explain `_init_` method with example.
9. Explain python lambda.
10. How to close a file? Explain in short.
11. What are the modes of a file with their short description?
12. How to close a connection?

Q-3 A. What is meaning of Type-Casting? Explain type casting functions of Python. [5]

B. Explain branching statement in Python [5]

OR

Q-3 A. List and explain Operators of Python in detail. [5]

B. Explain print() function in brief. [5]

Q-4 A. What is a string in Python? Explain ANY TWO methods of them with an example. [5]

B. Explain all Looping Statement with Example. [5]

OR

Q-4 A. What is Dictionary? Explain elements of Dictionary with Example. [5]

B. What is Python JSON? Explain with Example. [5]

Q-5 A. Explain any five error types with example. [5]

B. Differentiate between Method Overloading and Method Overriding. [5]

OR

Q-5 A. Explain create and call a function in python in detail with example. [5]

B. Write a detailed note on exception handling in python. [5]

Q-6 A. What is a file handling? Explain in detail open() and read() function. [10]

OR

Q-6 A. How to create a connection? Explain with example: Read operation. [10]
