

SARDAR PATEL UNIVERSITY
M.Sc. (Information Technology)
Semester –I External Examination
PS01CINT52 – Python Programming
27th April, 2022

Time: 12:00 P.M. to 2:00 P.M.

Max Marks: 70

Q1.

[A] Choose the most appropriate option for each question.

- i. `l = [ 4, 8, 9, 2.6, 5 ]`, in this example `l` is of _____ type. [8]
(A) Tuple (C) Set
(B) List (D) None of these
- ii. _____ function is used to accept input from the user.
(A) `read()` (C) A and B both
(B) `input()` (D) None of these
- iii. _____ keyword is used to define user-defined function.
(A) `fun` (C) `def`
(B) `define` (D) None of these
- iv. _____ loop not supported in Python.
(A) while loop (C) A and B both
(B) `do..while` loop (D) None of these
- v. _____ is the class that inherits from another class.
(A) Parent Class (C) A and B both
(B) Base Class (D) None of these
- vi. By default visibility mode of class properties is _____.
(A) Public (C) Protected
(B) Private (D) None of these
- vii. _____ adds an element at the end of the list.
(A) `copy()` (C) A and B both
(B) `append()` (D) None of these
- viii. _____ is not a valid data type in Python?
(A) Integer (C) String
(B) Character (D) None of these

Q1.

[B] Do As Directed

- i. Python is developed in C programming language. [True / False] [16]
ii. What is single line comment symbol in Python?
iii. Sets cannot have two items with the same value. [True / False]
iv. To create a list, it is also possible to use `list()` constructor. [True / False]
v. What is variable?
vi. Which function is used to display output in Python?
vii. What is Inheritance?
viii. What is use of `lower()`?
ix. What is use of `len()`?
x. What is Tkinter in Python?

- xi. What is list in Python?
- xii. What is child class?
- xiii. Give an example of text sequence type.
- xiv. What is Module?
- xv. What is GUI?
- xvi. What is cursor()?

Q2. Answer the following questions (Any Seven):

[14]

- a. List advantages of Python.
- b. Discuss join() with example
- c. List various data types in Python.
- d. What is **dictionary**?
- e. Give example to reverse the list.
- f. Explain for loop.
- g. What is user-defined function?
- h. Give an example of Constructor in Python.
- i. How to select MySQL database in Python?

Q3. Write Python program to read N number of numeric values through keyboard, add them to a list variable, and display minimum number among them. [8]

OR

Q3. What is tuple? Explain it in details taking suitable examples. [8]

Q4. Explain set in detail with examples. [8]

OR

Q4. Compare list, tuple and range. [8]

Q5. List various types of inheritance? Explain ANY THREE types of Inheritance with examples. [8]

OR

Q5. Write a short note on exception handling. [8]

Q6. Explain database connectivity with MySQL with example. [8]

OR

Q6. What is File Handling? Explain: open(), write(), read() with examples. [8]
