SARDAR PATEL UNIVERSITY**Master of Science (Information Technology) (Semester-I) Examination - 2023****PS01CINT52: Python Programming**

Date: 13/04/2023 (Thursday)

Time: 10:00 A.M. to 01:00 P.M.

NOTE: Figure to the right indicates full marks of the questions.

Total: 70 Marks

Q-1. Multiple Choice Questions.

[08]

1. Python is a ____ object-oriented programming language.
(A) General purpose (B) Special purpose
(C) Medium level (D) All of these
2. How is a code block indicated in Python?
(A) Brackets (B) Indentation
(C) Key (D) None of these
3. In python, what is method inside class?
(A) Attribute (B) Argument
(C) Function (D) Object
4. To read five characters from a file object readfile, we use ____
(A) readfile.read() (B) readfile.readlines()
(C) readfile.readline() (D) readfile.read(5)
5. In tuples values are enclosed in ____
(A) Parenthesis (B) Curly brackets
(C) Square brackets (D) None of these
6. Which keyword is used in Python to raise exceptions?
(A) try (B) raise
(C) goto (D) except
7. ____ is used for developing GUI application in python.
(A) kinter (B) tinker
(C) tkinter (D) None of these
8. List, tuple and range are the ____ of data types.
(A) Binary Types (B) Boolean Types
(C) String Types (D) Sequence Types

Q-2. Answer the following questions. (Attempt Any SEVEN).

[14]

1. What is the maximum length of a Python identifier?
2. What are Literals in Python? List different Literals of python.
3. What is function in python? Give Example.
4. What is the difference between List and Tuple?
5. What are python namespaces?

[PTO]

6. What is the difference between discard() and remove() method of set?
7. Define self in Python.
8. What is the difference between .py and .pyc files?
9. What is the pass statement in Python?

Q-3. Answer the following question.

- (A) Discuss the benefits of Python. [06]
 (B) List all the loops? Explain for loop and while loop in details with examples. [06]

OR

- (B) Explain about Python String formatters? [06]

Q-4. Answer the following question.

- (A) What is dictionary in python? Explain Update, delete and retrieve operation on it with example. [06]
 (B) What is set in python? Explain add, update, delete and retrieve operation on it with example. [06]

OR

- (B) What is list in python? Explain different operations of list. [06]

Q-5. Answer the following question.

- (A) Explain Inheritance in Python with proper example. [06]
 (B) Explain modules in Python with examples. [06]

OR

- (B) Define exception handler? Explain exception handling of python with proper example. [06]

Q-6. Answer the following question.

- (A) Explain various file handling functions with example. [06]
 (B) Explain any 6 Widgets of Python used in GUI application. [06]

OR

- (B) Explain the steps involved in database connection for python program. [06]
