

SEAT No. _____

No. of printed pages: 2

[20]

SARDAR PATEL UNIVERSITY
Master of Science (IT)
Semester – I External Examination
PS01CINT32 – Python Programming
Tuesday, 23rd February, 2021

Time: 10:00 A.M. to 12:00 P.M.

Max Marks: 70

Q1.

[A] Choose the most appropriate option for each question.

[8]

- i. _____ is a valid extension for Python program file.
(A) .p (C) .py
(B) .python (D) None of these
- ii. _____ is used to define a block of code in Python language.
(A) () (C) Indentation
(B) { } (D) None of these
- iii. Which one of following statement will check, a is equal to b?
(A) if a=b: (C) A and B both
(B) if a==b: (D) None of these
- iv. Which one of following is true about set?
(A) Unordered (C) A and B both
(B) Unindexed (D) None of these
- v. Which one of following is not a valid data type in Python?
(A) Integer (C) Character
(B) Float (D) None of these
- vi. Tuple values can be initialized between _____.
(A) () (C) { }
(B) [] (D) None of these
- vii. _____ is a function used to create a file using Python.
(A) fopen() (C) create()
(B) open() (D) None of these
- viii. _____ is single line comment symbol in Python.
(A) / (C) #
(B) @ (D) None of these

Q1.

[B] Do As Directed

[16]

- i. What is Python?
- ii. Python is open-source scripting language. [True / False]
- iii. What is use of int()?
- iv. What is use of float()?
- v. What is use of type()?
- vi. What is class?
- vii. _____ is the default visibility mode (access modifier) in class.

- viii. What is use of **import**?
- ix. List tuple methods.
- x. What is output of following code?

```
var1 = "vallabh vidyanagar"
print(len(var1))
```
- xi. Explain list() constructor.
- xii. What is use of **tkinter**?
- xiii. Explain fetchall().
- xiv. What is default data type of input value using input()?
- xv. Write **ANY TWO** operation modes of file handling.
- xvi. What is use of **GUI**?

Q2. Answer the following questions (Any Seven):

[14]

- a. List various benefits of Python.
- b. Explain: input() and print().
- c. Discuss multiline comment in Python taking suitable example.
- d. Distinguish between List and Tuple.
- e. Explain if... else... taking suitable example.
- f. Explain while() loop.
- g. Define: Parent class and Child class.
- h. What is user-defined function? Give an example.
- i. Explain upper() and lower().

Q3. List and explain various types of operators taking suitable examples.

[8]

OR

Q3. Explain For loop and range() taking suitable examples.

[8]

Q4. What is list? Discuss its syntax. Explain ANY THREE methods of it taking suitable examples.

[8]

OR

Q4. Explain mapping type dict in detail taking suitable examples.

[8]

Q5. What is Exception Handling? Explain try, except, finally keywords.

[8]

OR

Q5. What is Inheritance in Python? List various types of Inheritance and explain ANY TWO of them taking suitable examples.

[8]

Q6. Explain: open() , write() , read() and close().

[8]

OR

Q6. How to connect with MySQL database? Explain it taking suitable example. Also discuss about cursor() and execute().

[8]
