A. append
B. extend
C. add
D. None of the above
- _____ mode of file, opens a file for writing and creates the file if it does not exist.
A. r
B. w
C. a
D. x

Q-2 Give answer in short. (ANY SEVEN)

[14]

1. How to write comments in Python program?
2. What is Variable? Write down rules to write valid variable names.
3. Write down the features of Python programming language.
4. What is list? How to access elements of list?
5. What is dictionary? Give one example of it.
6. Differentiate between List and Tuple.
7. Explain in brief, Python *for* loop.
8. What is inheritance? List out the different types of inheritance.
9. Explain `_init_` method with example.

Q-3 A. Write a short note on the Data types of Python.

[6]

B. What do you mean by Type Casting? Explain type casting functions of Python.

[6]

OR

B. Write a short note on `input()` and `print()` functions.

[6]

Q-4 A. Write a note on `range()` function.

[6]

B. Explain below String methods with an example.

[6]

[1] `lower()` [2] `title()` [3] `isdigit()`

OR

B. Explain below the Python List methods with an example.

[6]

[1] `append()` [2] `insert()` [3] `pop()`

Q-5 A. What is a function? How to create and access functions in Python? Also explain return statement.

[6]

B. Explain Python modules with example.

[6]

OR

B. Explain ANY FIVE error types with example.

[6]

Q-6 A. What is Exception? Explain Exception handling mechanism in Python.

[6]

B. What is the importance of File handling? Explain `open()` function in detail.

[6]

OR

B. How to create a connection to MYSQL database? Also explain Insert operation with example.

[6]
