SARDAR PATEL UNIVERSITY

M. SC. (INFORMATION TECHNOLOGY)

SEMESTER – I

PS01CINT04 (RDBMS & CLIENT SERVER COMPUTING)

18TH APRIL, 2017

Time : 10:00 a.m. to 1:00 p.m.

Marks : 70

Note : Answers of all the questions (including multiple choice questions) should be written in the provided answer book only.

Q-1 Pick up the most appropriate answer from the given alternatives and write in your answer book. (8)

- (i) The INSERT command is an example of -
(A) DML (B) DCL (C) DDL (D) None of these
- (ii) A query places inside another query is known as -
(A) doublequery (B) metaquery (C) subquery (D) None of these
- (iii) Fully Functional Dependency is associated with -
(A) 2NF (B) 3NF (C) 4NF (D) None of these
- (iv) PL/SQL is a _____ language.
(A) procedural (B) non-procedural (C) both (D) None of these
- (v) NULL means -
(A) zero (B) blank (C) unknown (D) None of these
- (vi) We can modify the structure of a table using _____ command.
(A) UPDATE (B) DELETE (C) ALTER (D) None of these
- (vii) _____ command is used to assign object privileges.
(A) GRANT (B) ASSIGN (C) REVOKE (D) None of these
- (viii) Which one of the followings is not an Oracle Database object?
(A) TABLE (B) VIEW (C) QUERY (D) INDEX

Q-2 Attempt the following: (ANY SEVEN)

(14)

- i. What is RDBMS? State the benefits of RDBMS.
- ii. What is View? Write down an example of CREATE VIEW command.
- iii. What do you mean by front-end and back-end tools.
- iv. Differentiate: GRANT and REVOKE.
- v. Explain COMMIT and ROLLBACK statement.
- vi. Explain LIKE operator with an example.
- vii. Explain CREATE INDEX command with an example.
- viii. What is Pseudo Column? Give two examples of Pseudo columns.
- ix. State the benefits of using stored procedure.

(1)

- Q-3 (a)** What is Normalization? Explain 1NF, 2NF and 3NF with an example. (6)
(b) List Dr. E. F. Codd Rules. Explain any four of them in brief. (6)

OR

- (b)** Draw a Context Level diagram, 1st Level DFD and 2nd Level DFD for Library Environment. (6)
Q-4 (a) Define 'Join'. List various types of Joins. Explain any three of them. (6)
(b) List and explain in brief various data constraints by taking suitable example. (6)

OR

- (b)** Define the term 'Exception'. How can we define our own exception? Explain any two pre-defined exception with an example. (6)
Q-5 (a) What is PL/SQL? Explain the basic structure of a PL/SQL block? Explain in brief with suitable example the exceptional handling mechanism used in PL/SQL block. (6)
(b) What is trigger? List various types of trigger. Explain creation of trigger with its syntax and example. (6)

OR

- (b)** What is Data Model? Explain Network model and Hierarchical model in brief. (6)
Q-6 (a) Explain 2-tier and 3-tier client-server architecture. (6)
(b) List various types of commit protocols. Explain 2-phase commit protocol. (6)

OR

- (b)** What is sequence? Explain the process of creating and dropping sequence object with an example. (6)

———— x ——— x ———

(2)
