SARDAR PATEL UNIVERSITY**M.Sc. (IT) (Sem-1) November - 2024****PS01CINT54 – Relational Database Management Systems****Date: 27.11.2024 (Wednesday)****Marks: 70****Time: 10.00 AM - 01.00 PM****Q-1 MCQ****[08]**

1. The _____ of a database describes its overall structure.
A. Schema
B. Instance
C. Design
D. Structure
2. Which of the following refers to the level of data abstraction that describes exactly how the data actually stored?
A. Conceptual level
B. Physical Level
C. File Level
D. Logical Level
3. In a Database Management System, a / an _____ is a piece of data that is stored in the database.
A. Schema
B. Object
C. Entity
D. Information
4. When the same entity participates in the relationships more than once is called _____ relationship.
A. One-to-One
B. One-to-Many
C. Many-to-Many
D. Recursive
5. To reduce redundant data to the minimum possible and object is create called...
A. Synonym
B. Views
C. Sequences
D. Indexes
6. A Sub query is also termed as _____ query
A. nested
B. view
C. index
D. joins
7. The procedure are stored in _____
A. oracle database
B. SGA
C. Client machine
D. None of these
8. A _____ is an oracle object, which holds other objects in it.
A. trigger
B. procedure
C. function
D. package

Q-2 Give answer in short. (ANY SEVEN)

[14]

1. Briefly discuss need of DBMS.
2. Draw Three-schema architecture with its basic objective.
3. Briefly explain concept of Data Backup and Data Recovery.
4. Explain Weak and Strong entity through example.
5. Explain E-R Diagram with its use. Draw symbols used to draw E-R diagram.
6. What is sub query? Give an example.
7. What do you mean by SQL?
8. Draw the structure of PL/SQL block.
9. What is Trigger? List types of trigger.

Q-3 A. What is DBMS? Discuss about users associated with DBMS and their roles in detail. [6]

B. Write a note on Data Integrity. [6]

OR

B. What do you mean by Data Sharing? List types of Data Sharing and explain ANY ONE of them in detail [6]

Q-4 A. What is Normalization? Give reasons to adopt Normalization? Explain 2-NF and 3-NF with suitable example. [6]

B. Explain Relationship? Discuss degree of relationship with appropriate illustration. [6]

OR

B. Define: Keys. Discuss different types of keys related to relational database in brief. [6]

Q-5 A. Explain ANY FOUR string function used in SQL with example. [6]

B. What is index? How various types of indexes are created? Explain with syntax and example. [6]

OR

B. List different types of join. Explain with syntax and example [6]

Q-6 A. What is a Cursor? Discuss the use of cursor in PL/SQL block with an example. [6]

B. Write a brief note on stored procedure & function with syntax and example. [6]

OR

B. List and explain data types used in PL/SQL block. [6]
