

[11]

SARDAR PATEL UNIVERSITY

External Examination February-2021

M.Sc - Information Technology (IT) 1st Semester

PS01CINT25: System Analysis and Design [NC]

Date: 26-02-2021

Time: 10.00am-12.00pm

Total Marks: 70

Q.1[A]

Give answers of following Multiple Choice Questions.

[08]

- 1 _____ assists managers in decision making and problem solving.

A	MIS	B	DSS
C	TPS	D	EIS

- 2 _____ is a logical boundary of system development.

A	Condition	B	Deadline
C	Both (A) and (B)	D	None of these

- 3 _____ is not a fact finding technique.

A	Interviewing	B	Questionnaires
C	Record inspection	D	Data input

- 4 _____ is last stage of SDLC.

A	Feasibility study	B	System requirement Analysis
C	System Design Specifications	D	Evaluation of the System

- 5 _____ testing test an individual unit of a system.

A	Independent	B	Integrated
C	Unit	D	Classical

- 6 _____ is a repository of all data related to the system.

A	Constant	B	Integrated Tool
C	CASE tool	D	None of these.

- 7 _____ is a smallest individual unit of a system which cannot be divided further.

A	Subsystem	B	System
C	Basic component	D	None of these.

- 8 _____ is a kind of physical object.

A	Logic	B	Boundary
C	Tool	D	None of these.

Q-1[B]

- 1 What is TPS? Give examples of it.

[16]

- 2 Define Data and Information.

- 3 What is technical feasibility?

- 4 Define System design.

- 5 CASE stands for _____.

- 6 System development process is called _____.

- 7 _____ engineering is a process of obtaining desired software from the specifications in hand.

- 8 OO Approach stands for _____.

- 9 Output is defined as the result of operation. [TRUE/FALSE]

- 10 Design Flow Diagram is full form of DFD. [TRUE/FALSE]

- 11 System is a set of components working together for common goal. [TRUE/FALSE]

- 12 Problem identification is third step of SDLC. [TRUE/FALSE]

- 13 Prototyping Model is a software development model in which prototype is built, tested, and reworked until an acceptable prototype is achieved. [TRUE/FALSE]
- 14 CASE tools are limited to system analysis only. [TRUE/FALSE]
- 15 The top-down analysis method makes each component easier to analyze and deal with. [TRUE/FALSE]
- 16 Adaptive maintenance is not a type of maintenance. [TRUE/FALSE]

Q.2 Answer the following Short Questions. (Attempt any Seven) [14]

- 1 Draw Data Pyramid.
- 2 Define system. List the basic components of system.
- 3 Give two differences between Physical DFD and Logical DFD.
- 4 List the stages of SDLC.
- 5 Explain use of prototype and misconceptions.
- 6 What is System Prototype method?
- 7 List and Explain objectives for training.
- 8 Explain System Testing.
- 9 What is record inspection?

Q.3 [A] List and explain basic components of system. [4]

[B] Explain System Analyst role and work. [4]

OR

Q-3 Explain MIS in detail. [8]

Q.4 [A] Write a note on interview technique. [4]

[B] Which symbols are used to draw DFD? [4]

Draw the context level diagram for Railway Reservation system.

OR

Q.4 What is SDLC? Explain various stages of SDLC in 2-3 lines. [8]

Q.5 Write a note on CASE Tools in detail. [8]

OR

Q-5 [A] List and Explain Front end tools. [4]

[B] List and Explain Back end tools. [4]

Q.6 List System Conversation Methods. Explain any two out of them in detail. [8]

OR

Q.6 Explain Post Implementation Review. [8]
