

SARDAR PATEL UNIVERSITY
M.Sc (IT) Semester-III (CBCS) (NC) Examination
[PS03EINT31] : Software Testing
Saturday, 9th April-2022

Time: 12.00pm to 2.00pm

Total Marks: 70

Note: Figure indicates at right is maximum marks for question.

Q-1

[A] Select an appropriate option for the following statements.

[08]

1. Process to determine the cause of fault and to remove it is known as _____.
 [a] Debugging [b] Bugs
 [c] Fault [d] Failure
2. _____ refers to the process of checking that the developed software meets the requirement.
 [a] Verification [b] Validation
 [c] Authentication [d] Testing
3. _____ testing may be done mainly by Black box testing methodology.
 [a] Functional [b] Structural
 [c] Both [a] & [b] [d] None of these
4. The rationale behind _____ is that the errors in coding generally occur at the boundaries of the data set.
 [a] Boundary Value Analysis [b] Control Flow Testing
 [c] Decision Table Based Testing [d] None of these
5. Which test case cannot be executed alone or it may not be economical to execute test cases as a single entity?
 [a] Test Sequence [b] Test Pre-condition
 [c] Test Scenario [d] Test Case
6. The process of execution of test cases is called _____.
 [a] Test Suite [b] Test Step
 [c] Test Scenario [d] Test Execution
7. _____ tools used for implementation, execution in testing.
 [a] Test Execution Tool [b] Test Comparators
 [c] Performance Testing Tool [d] Static Analysis Tool
8. Project Planning and tracking Tools used for _____.
 [a] Planning [b] Provides structural coverage
 [c] Managing the test [d] Static testing

Q-1 [B] Do as Directed.

[16]

Fill in the blanks.

1. _____ model has the repetitive process and is allows versions of the product for every cycle?
2. _____ testing validates the system software against the functional specification.
3. _____ cannot be tested automatically by a script.
4. NG stands for _____.

State whether below given statement is True or False.

5. An error is a human action that produces the incorrect result that results in a fault.
6. Acceptance testing involves to analyzing each unit or an individual component of the software application.
7. Functional Testing may concentrate on meeting requirement by Black Box Testing.
8. White Box Testing is not a primary method of verification.
9. There have been one or more test cases covering the requirement.
10. Functional Testing is not a test type.
11. Test data preparation on tools used for planning.
12. The open-source Sahi is written using Python programming language.

Give answer for the following.

13. Which model considered as a superior of Waterfall model?
14. Give the term for a set of tests which helps testers in executing and reporting the test execution status.
15. Which test document describes the exit criteria of testing?
16. Give the name of open source GUI based test automation tool.

Q-2 Answer the Following Questions in brief (Attempt any Seven)

[14]

1. What are the objectives of software testing?
2. What is milestone in software testing?
3. Explain Test, Test Case and Test Suite.
4. List out various Structural testing techniques.
5. Compare Functional Testing with Structural Testing.
6. Discuss Test selection criteria.
7. What is Test execution?
8. List various Testing Tools.
9. What are the different parameters for classification of testing tools?

Q-3 Discuss characteristics and principle of Software Testing.

[08]

OR

Q-3 Discuss Software Testing Process in detail.

Q-4 Explain any one boundary value analysis testing technique in detail.

[08]

OR

Q-4 Explain mutation testing technique in detail.

Q-5 Discuss typical test case parameters and draw template format for typical Test Case.

[08]

OR

Q-5 Write a note on structural testing.

Q-6 Discuss need of software testing with benefits and drawbacks of Testing Tools in detail

[08]

OR

Q-6 Write a detail note on any two Testing Tools.
