SARDAR PATEL UNIVERSITY
M.Sc (IT) Semester-III (CBCS) Examination
[PS03EINT31] : Software Testing
Saturday, 27th November-2021

Time: 3.00pm to 5.00pm

Total Marks: 70

Note: Figure indicates at right is maximum marks for question.

Q-1**[A] Select an appropriate option for the following statements.****[08]**

1. Software _____ is a method to check whether the actual software product matches expected requirements and to ensure that software product is defect free.
[a] Testing [b] Coding
[c] Design [d] Model
2. _____ refers to the process of ensuring that the software is developed according to its specifications.
[a] Verification [b] Validation
[c] Authentication [d] Testing
3. Boundary value analysis testing technique follows _____ methodology.
[a] White-Box [b] Black-Box
[c] Grey-Box [d] Open-Box
4. _____ is a structural testing technique.
[a] Boundary Value Analysis [b] Control Flow Testing
[c] Decision Table Based Testing [d] None of these
5. From the following which test document describes the exit criteria of testing?
[a] Test Case [b] Test Plan
[c] Test Summary Report [d] Defect Report
6. The process of execution of test cases is called _____.
[a] Test Suite [b] Test Step
[c] Test Scenario [d] Test Execution
7. _____ is an open-source load testing tool.
[a] Google Chrome [b] Apache JMeter
[c] Selenium [d] Junit
8. Test Data Preparation tools used for _____.
[a] Execution [b] Cost Estimation
[c] Managing the test [d] Planning

Q-1 [B] Do as Directed.**[16]****Fill in the blanks.**

1. Every _____ will have a unique identification number
2. _____ testing technique is used to check the boundaries for the input values.
3. The set of test cases is known as _____.
4. Project Planning and tracking Tools used for _____.

[P.T.O]

State whether below given statement is True or False.

5. An error is a human action that produces the incorrect result that results in a fault.
6. The milestones are the events that are used to ascertain the planning of the project.
7. Unit testing is used to test if software modules are satisfying the given requirement or not.
8. Manual testing is cost effective and less time consuming.
9. CAPTCHA can not be tested automatically by a script.
10. Functional Testing is type of test design technique.
11. JUnit is an open-source Unit Testing Framework for JAVA.
12. The open-source Sahi is written using Python programming language.

Give answer for the following.

13. Give name of model which is more focused on risk analysis.
14. Define: Test case and Test Suite
15. Define: Functional Testing
16. Give the name of automated testing tool used for mobile application

Q-2 Answer the Following Questions in brief (Attempt any Seven)

[14]

1. Define: Software Validation
2. What is milestone in software testing?
3. What do you mean by fault, error, bug and failure?
4. Compare Functional Testing with Structural Testing.
5. Explain Control Flow Testing.
6. Discuss Test selection criteria.
7. What is Test case specification?
8. What is Test Complete?
9. List various types of Testing tools.

Q-3 List types of Software Testing Models and discuss any two of them in detail

[08]

OR

Q-3 Write a note on Software Testing Life Cycle (Software Testing Process).

Q-4 List Functional Testing Technique and discuss any one of them in detail with example.

[08]

OR

Q-4 List Structural Testing Technique and discuss any one of them in detail with example.

Q-5 Draw the template for the typical Test Case. Explain about typical test case parameters.

[08]

OR

Q-5 Consider a program for the determination of the largest number amongst given 3 numbers. Their inputs are triple positive integers [say x, y and z] and value from interval [1-300]. Design test cases using boundary value analysis.

Q-6 What is Testing? Discuss need of software testing with merits and demerits of using Testing Tools.

[08]

OR

Q-6 Discuss any two Open-Source Software tools with its usage
