

Total Marks: 70

[10]

- _____ format specifier is used to display integer values.

 - %d
 - %c
 - %s
 - %lf
- Which symbol is used to represent decision making in flowchart ?

 - Square
 - Diamond
 - Parallelogram
 - Oval
- Value that change during program execution is known as _____.

 - Constant
 - Variable
 - Expression
 - Condition
- _____ statement increment value of variable by 1.

 - &
 - ++
 - *
 -
- do while is also known as _____.

 - Entry Controlled
 - Exit Controlled
 - Both a and b
 - None of these
- isdigit() function is available in _____ header file.

 - conio.h
 - string.h
 - ctype.h
 - math.h
- In an one dimensional array subscript of the first element of array is _____.

 - 1
 - 2
 - 1
 - 4
- _____ library function returns absolute value.

 - strlen()
 - abs()
 - sqr()
 - pow()
- Strings are enclosed within _____.

 - Semicolon
 - Single quote
 - Double quote
 - Ampersand
- If the function returns value _____ statement is used.

 - getch
 - void
 - NULl
 - return

(P.T.O.)

Q2. Answer the following short questions (Attempt any TEN) [20]

1. Define Algorithm.
2. List all computer languages.
3. What is an Editor? Give 3 examples of Well Know Editors.
4. Explain purpose of scanf() statement with example.
5. List different types of loop.
6. Give two valid variable names.
7. List out any four mathematical functions.
8. Define Array.
9. Explain break statement in brief.
10. List all categories of functions.
11. Give two examples of library functions.
12. What is string? Write the syntax of declaring string in c. Give example.

- Q3.a. What is Flow chart? Explain symbols used to draw a flow chart. [05]
b. What is Translator? Explain compiler and Interpreter in brief. [05]

OR

- Q3.a. Explain Assembly Language with advantage and disadvantages. [05]
b. Write Algorithm or draw flowchart to find out minimum from 3 given numbers. [05]

- Q4.a. Explain switch statement in detail with example. [06]
b. Explain if and if..else with syntax and example. [04]

OR

- Q4.a. What is operator? Explain different operators with example. [06]
b. Explain basic data types used in C language. [04]

- Q5.a. Explain declaration and initialization of Two dimensional array with syntax and example. [05]
b. Explain **pow()** and **sqrt()** function with syntax and example. [05]

OR

- Q5.a. Explain declaration and initialization of One dimensional array with syntax and example. [05]
b. Explain any two loop statements in detail with example. [05]

- Q6. What is string. Explain following function string handling functions with syntax and example. [10]
i) **strrev()** ii) **strlen()** iii) **gets()**

OR

- Q6. Define function. Explain any one function category with example in detail. [10]
