

Q1. Multiple Choice Questions.

[10]

1. Mnemonic a memory trick is used in which of the following language?

A. Assembly language	C. High Level
B. Machine language	D. All of the above.
2. What symbol is used to represent output in a flowchart?

A. Parallelogram	C. Oval
B. Rectangle.	D. Diamond
3. %d format specifier is used for _____.

A. string	C. character
B. float	D. integer
4. The value cannot be changed during program execution is known as _____.

A. variable	C. argument
B. constant	D. parameter
5. Which of the following backslash character constant is used for horizontal tab?

A. \b	C. \n
B. \d	D. \t
6. Two dimensional array uses _____ number of subscripts.

A. 1	C. 2
B. 3	D. 4
7. isupper() function checks input is _____ or not.

A. Uppercase	C. Lowercase
B. Alphabet	D. Character
8. An array can be initialize either at compile time or at _____.

A. Run time	C. Allocation time
B. Release time	D. None of these
9. _____ function compares two strings.

A. gets	C. strcmp
B. strlen	D. strcat
10. _____ function is used to read the string.

A. strlen	C. scanf
B. strcmp	D. strrev

Q2. Answer the following short questions (Attempt any TEN)

[20]

1. What is Translator? List all translators.
2. What is an algorithm? List Characteristics of an algorithm.
3. What is an editor? State 3 well known editors.
4. Draw the basic structure of C program.
5. Write rules of variable name.
6. Explain arithmetic operators.
7. Write difference between while and do while loop.
8. Explain break statement in brief.
9. List any 4 functions of math.h file and state their use.
10. List advantages of functions.
11. Explain strrev() function with example.
12. List categories of User Defined Functions?

Q3. Explain any 2 types of translators in detail.

[10]

OR

Q3. Define Flowchart. Explain Rules to draw flowchart. Also explain symbols used to draw flowchart.

[10]

Q4.a. What is an operator? List all operators. Explain relational operator and increment operator with example.

[6]

b. Explain printf() and scanf() statement with syntax and example.

[4]

OR

Q4.a. Explain simple if and if...else statement with example.

[6]

b. Explain switch statement with syntax and example.

[4]

Q5.a. Define array. Explain one dimensional array with example.

[6]

b. Explain for loop statement with example.

[4]

OR

Q5.a. Explain following functions : i) islower ii) abs iii) clrscr

[6]

b. Explain while loop with example.

[4]

Q6.a. Explain function with argument with return value.

[5]

b. What is string? Explain declaration and initialization of string in C.

[5]

OR

Q6.a. Explain return statement with syntax and example.

[5]

b. Explain strcmp() and strlen() with example.

[5]

$X = X = X$
