SARDAR PATEL UNIVERSITY

M.Sc. CA&IT (Regular)

2nd Semester (CBCS)

Tuesday, Date: 22/09/2020

Session : Evening Time : 3:00 pm to 5:00 pm

Subject Code: PS02CIIT32

Subject Title : Wireless Communication

Total Marks: 70

Q1. Multiple Choice Questions. (1 Mark each)

[10]

1. Which of the following is false statement for Bluetooth networks?
 - a. It is made of piconet and scatternet
 - b. Allows users to make permanent connections
 - c. Signals can pass through walls, clothings.
 - d. Short range communication
2. User is able to move from one physical location to another and use the same service is related to _____ mobility.
 - a. User
 - b. Device
 - c. Network
 - d. Session
3. Which of the following can be application of Local category of 3G networks?
 - a. Stock updates
 - b. E-Mail
 - c. Online booking
 - d. Games
4. _____ is required for Infrastructure mode of Wireless LAN.
 - a. Mobile phone
 - b. Wireless stations
 - c. Access point
 - d. Desktop
5. _____ stores data of the mobile equipment in GPRS networks.
 - a. HLR
 - b. VLR
 - c. AUC
 - d. EIR
6. _____ are two modes of GPRS networks.
 - a. Application and Tunneling
 - b. Application and Service
 - c. Data and Tunneling
 - d. Data and Service
7. Cell clusters design of GSM are _____ in shape.
 - a. Square
 - b. Hexagon
 - c. Rectangle
 - d. Oval
8. Every mobile has a unique identifier known as _____ number.
 - a. ISDN
 - b. IMSI
 - c. TMSI
 - d. IMEI
9. HTML, HTTP, HTTPS, SOAP, IIOP protocols are used at _____ tier.
 - a. User
 - b. Data
 - c. Presentation
 - d. All of the above
10. Transcoding in space and dimension is known as _____.
 - a. Temporal
 - b. Color
 - c. Object
 - d. Spatial

(1)

(P.T.O.)

Q2. Fill in the Blanks and True/False (One mark each) [08]

1. _____ mobility deals with user movement from one network to another.
2. _____ are the mobile programs that go places in the network to carry out their owner's instructions.
3. In _____ mode the user will be using the GPRS mobile phone to access the applications running on the phone itself.
4. _____ Tire of Mobile computing architecture deals with Database Management.
5. Bluetooth technology allows users to make adhoc wireless connections between the devices.(True/False)
6. E-mail is an application of communication application.(True/False)
7. GPRS has unlimited cell capacity for all users.(True/False)
8. SMS are basically of 2 types, SM MT and SM MO.(True/False)

Q3. Answer the following short questions (Attempt any Ten) [20]

1. What are active and passive RFID tags.
2. List applications of Bluetooth.
3. Define mobile computing.
4. List applications of Wireless LAN.
5. List different types of Wireless LAN.
6. Give full form of WAP. Explain purpose of WAP protocol.
7. List different classes of GPRS handsets.
8. List nodes of GPRS Networks.
9. What information is stored in VLR.
10. Explain cell design of GSM.
11. List design considerations of mobile computing.
12. List few usage of SMS.

Q4. Attempt any four Long Questions [32]

1. Explain types, components and applications of RFID in detail.
2. Define Mobile Computing Explain any 6 different names given to Mobile computing in different contexts.
3. List and explain advantages of Wireless LAN in detail.
4. Explain the following concepts :
 - i) Virtual Carrier Sense Mechanism for CSMA/CA protocol
 - ii) Active and Passive Scanning, Authentication and Association Process.
5. Explain GPRS System Architecture in detail.
6. Write short note on WAP.
7. Explain flow of SMS between two Mobile Stations.
8. Explain GSM Architecture in detail.
