

[64]

SARDAR PATEL UNIVERSITY
M.Sc. (CA & IT) EXAMINATION, III SEM

Date : 29th Dec-2020, Tuesday
Session : Morning
Course No : PS03CIIT32

Time : 10:00am To 12:00pm
Sub: Data Warehouse and Data Mining
Total marks : 70

Q – 1 Multiple Choice Question**[10]**

- i) _____ is a good alternative to the star schema
 - a) Advance Star Schema
 - b) Snowflake schema
 - c) Fact Constellation
 - d) Star- snowflake schema
- ii) The _____ allows the selection of the relevant information necessary for the data warehouse
 - a) top-down view
 - b) data warehouse view
 - c) data source view
 - d) business query view
- iii) _____ is the specialized data warehouse database.
 - a) Oracle
 - b) DBZ
 - c) Informix
 - d) Redbrick
- iv) _____ is a process of determining the preference of customer's majority.
 - a) Association.
 - b) Preferencing
 - c) Segmentation.
 - d) Classification
- v) _____ is used to proceed from very specific knowledge to more general information.
 - a) Induction
 - b) Compression
 - c) Approximation
 - d) Substitution
- vi) The second phase of A Priori algorithm is _____.
 - a) Candidate generation.
 - b) Item set generation.
 - c) Pruning
 - d) Partitioning
- vii) The absolute number of transactions supporting X in T is called _____.
 - a) confidence.
 - b) support.
 - c) Support Count
 - d) None
- viii) _____ data consists of sample input data as well as the classification assignment for the data.
 - a) Missing.
 - b) Measuring.
 - c) Non-training.
 - d) Training.
- ix) The network topology is constrained to be _____.
 - a) Feed forward
 - b) Feed backward
 - c) Feed free
 - d) Feed Busy
- x) The sigmoid function also known as _____ functions.
 - a) Regression
 - b) Logistic
 - c) Probability
 - d) Neural

Q – 2 Fill in the Blanks and True – False**[08]**

- i) Data warehouse bus matrix is a combination of Dimensions and Data Mart (True / False)
- ii) _____ describes the data contained in the data warehouse.
- iii) Link Analysis is otherwise called as affinity analysis. (True / False)
- iv) Treating incorrect or missing data is called as _____.
- v) The value says that transactions in D that support X also support Y is called confidence. (True / False)
- vi) The right hand side of an association rule is called _____.
- vii) Each neuron is made up of a number of nerve fibres called Electrons. (True / False)
- viii) Rule based classification algorithms generate _____ rule to perform the classification.

[1]

(P.T.O.)

Q – 3 Short Answer **attempt any ten (Each carry 2 marks)**

[20]

- i) Write difference between Data Warehouse and Data Mart
- ii) Draw a figure of data warehouse building blocks or components
- iii) Write significant factors which drove companies for Data Warehousing
- iv) Explain Types of Metadata.
- v) Explain cluster analysis
- vi) Write major task in data processing
- vii) Write about market basket analysis
- viii) Explain improving the efficiency of Apriori.
- ix) What do you mean by Classification
- x) Write about data classification process
- xi) What is Bayesian belief network
- xii) What do you mean by classification by Backpropagation

Q – 4 Attempt any four (**Each carry 8 marks**)

[32]

- i) What is significant trend? Explain any eight
- ii) Explain ROLAP versus MOLAP.
- iii) Explain major issues in Data Mining
- iv) Explain Data Cleaning in detail
- v) Which Patterns are interesting? Discuss pattern evaluation methods
- vi) Explain the Apriori in detail.
- vii) Explain Decision Tree induction
- viii) Write about attribute selection measures
