SEAT No. _____

No. of Printed Pages : 2

SARDAR PATEL UNIVERSITY
B.Sc. (CA & IT) (INTEGRATED): SEMESTER – III
M.Sc. IT (INTEGRATED) (NC)
PS03CIIIT03: Object Oriented Programming and C++

Date: 27/10/2018, ~~Saturday~~ Time : 10:00am to 01:00pm

Max.Marks : 70

Q.1 Multiple choice of Question:

10

- [1] _____ is called the insertion or put to operator
[A] & [B] << [C] >> [D] ::
- [2] The header file _____ should be included that use input/output statements.
[A] iostream.h [B] stdio.h [C] conio.h [D] io.h
- [3] C++ supports _____
[A] anywhere declaration of variable
[B] Dynamic initialization of variable
[C] Reference variable
[D] All
- [4] _____ operator is the same as "scanf()" function used in C.
[A] cin [B] cout [C] scanf [D] println
- [5] _____ is a user define data type.
[A] Class [B] Variable [C] Operator [D] Function
- [6] _____ is used to free/destroy the memory occupied by the objects.
[A] Constructor [B] Destructor [C] Delete [D] None
- [7] Defining a function with same name but different types & no. of arguments is known as _____.
[A] inheritance [B] function overloading
[C] function overriding [D] Inline function.
- [8] A pure virtual function is equated to _____.
[A] zero [B] -1 [C] 1 [D] NULL
- [9] Which one of the following operators can be overloaded?
[A] :: [B] New [C] .* [D] Sizeof
- [10] To overload the += operator
[A] Only the + operator needs to be overloaded.
[B] Only the + and = operators need to be overloaded.
[C] The += operator must be explicitly overloaded.
[D] The + and = operators need to be overloaded implicitly.

Q.2 Answer the following in short (Any 10) :

20

- [1] List out the features of OOP.
- [2] List out any four header file in C++.
- [3] Differentiate : Objects and Classes
- [4] Write syntax for declare & initialize one dimensional array with example.
- [5] Write characteristics of constructor.
- [6] List the characteristics of member function.
- [7] What is a virtual base-class? What is the use of it?
- [8] List situations when inline function is not expanded inline.
- [9] Define virtual function.
- [10] What is stream?
- [11] What is this pointer?
- [12] Can we overload destructor? Explain your answer.

(1)

(P.T.O.)

Q.3	[A] Differentiate OOP & POP.	5
	[B] Explain usage of header file in C++.	5
	OR	
Q.3	Explain different data type available in C++.	10
Q.4	[A] Explain live objects with proper example.	5
	[B] Explain constructor overloading with example.	5
	OR	
Q.4	[A] Explain Copy constructor with example.	5
	[B] Explain all operations on Arrays.	5
Q.5	[A] Explain multiple inheritance with suitable example.	5
	[B] Discuss inheritance in private mode & its effects on accessibility of base-class members.	5
	OR	
Q.5	[A] Explain multilevel inheritance with suitable example.	5
	[B] Explain the concept of friend function with suitable example.	5
Q.6	[A] Explain binary operator overloading with example.	5
	[B] What is file mode? Describe the various file mode operations available.	5
	OR	
Q.6	[A] Explain unary operator overloading with example.	5
	[B] Explain binary operator overloading using friend function. Give example.	5
