(a) Virus (b) Adware (c) Trojan horse (d) Spyware

①

(P.T.O.)

10. _____ Viruses infects the storage media on which OS is stored and which is used to start the computer system.
 (a) BIOS (b) Track sector (c) Boot sector (d) Program

Q-2 Answer the following questions. (Attempt any TEN) 20

1. What is cybercrime? How do you define it?
2. Explain salami attack with example.
3. List down all possible cybercrimes against organization.
4. Explain the terms: (i) Attack vector (ii) Network scanning
5. Explain how stalking works.
6. List any three risks associated with cloud computing environment.
7. How to protect from mobile malware attacks?
8. Explain registry settings for mobile devices.
9. How vishing works?
10. List out purposes of proxy servers.
11. How virus can infect your computer?
12. List out general guidelines applicable to the password policies.

Q-3

- (a) Explain global co-operation required in fighting against cybercrime. 5
 (b) Explain spamming in detail. 5

OR

Q-3

- (a) Explain credit card fraud in detail. 5
 (b) Explain pornographic offences in detail. 5

Q-4

- (a) List and explain categories of cybercrime. 5
 (b) List and explain security measures for computer system. 5

OR

Q-4

- (a) List and explain types of services provided by cloud computing. 5
 (b) Explain passive attack. 5

Q-5 What is Bluetooth? List and explain Bluetooth tools and Bluetooth specific security issues. 10

OR

Q-5 Explain security challenges posed by mobile devices. 10

Q-6

- (a) Explain types of viruses. 5
 (b) Explain password cracking in detail. 5

OR

Q-6

- (a) What do you mean by phishing? How phishing works? 5
 (b) How to protect from Trojan horses and backdoors? 5
