

(165/208)

SEAT No. _____

No. of Printed Pages : 2

B.Sc. CA & IT / **SARDAR PATEL UNIVERSITY**
M.Sc.INFO. & TECH.(INTEGRATED) EXAMINATION, Vth SEMESTER
Wednesday, 24th October, 2018
2:00 p.m. to 5:00 p.m.

PS05CIT01[Software Engineering- I]

Maximum Marks: 70

- Q-1 Multiple Choice Question.[Each Question carries one Mark] [10]
- 1) _____ is the simplest and most widely used software development model.
A) Spiral B) Spiral
C) Iterative enhancement D) Iterative enhancement
 - 2) _____ part requires major efforts.
A) Testing B) Maintenance
C) Coding D) Design
 - 3) The coding should be follow rules of _____.
A) Structure Programming B) UML
C) Integrated Programming D) OOPs
 - 4) An SRS establishes the basis for agreement between the _____ and the _____.
A) User & Product B) Client & Supplier
C) Product & Quality D) Developers & Project
 - 5) _____ characteristic of SRS means the entire requirement denotes one interpretation.
A) Complete B) Reliability
C) Unambiguous D) Traceable
 - 6) (SQAP) means _____.
A) Software Quality Assurance Plan B) System Quality Appearance Plans
C) Software Quick Activity Plans D) System Quantity Assurance Process
 - 7) PDL stands for
A) Process Define Language B) Prefer Define Language
C) Procedure Design Language D) Process Design Language
 - 8) Most common method for designing algorithm is _____.
A) Object refinement B) Procedural refinement
C) Step wise refinement D) All of them
 - 9) Structured programming is often called _____ programming
A) goto-less B) object oriented
C) procedural D) None of these
 - 10) The single-entry, single-exit constructs are also called.
A) control constructs B) iteration constructs
C) selection constructs D) None of these

- Q-2 Give Answers for the following:(Any ten) [20]
- 1 Write a short note on maintenance phase.
 - 2 List down characteristics of software process.
 - 3 Define: software and software Engineering.
 - 4 Justify the following.
“The objective of SRS is to specify what is needed from the system, not how the system will provide it.”
 - 5 Explain Partitioning.
 - 6 Explain Risk management.
 - 7 Differentiate between System design and Detailed design.
 - 8 List the levels of Cohesion.
 - 9 Differentiate between Functional and Object-oriented approaches.
 - 10 Write the goal of coding.
 - 11 List at least 4 general rules of programming style.
 - 12 Draw the diagram of levels of testing.
- Q-3 A) Explain prototype model in detail. [5]
B) Explain Design phase of software development in detail.. [5]
- OR
- Q-3 A) Explain error and effort distribution. [5]
B) Explain any two characteristics of software process in detail. [5]
- Q-4 What is SRS? Explain characteristics of SRS. [10]
- OR
- Q-4 What do you mean by COCOMO Model? Explain in detail with example. [10]
- Q-5 A) Write a short note on Cohesion. [5]
B) Explain the verification techniques for Detailed Design. [5]
- OR
- Q-5 A) List basic principles of design and explain any one in detail. [5]
B) Write a short note on Coupling. [5]
- Q-6 A) List all the rules to write the code in coding phase. [5]
B) Explain the Top-Down and Bottom-Up approach in testing phase. [5]
- OR
- Q-6 A) Explain levels of testing using diagram. [5]
B) Explain the Top-Down and Bottom-Up approach in coding. [5]
