(A-33)

No. of Printed Pages: 02

SARDAR PATEL UNIVERSITY
M.Sc.IT (Integrated) EXAMINATION, VIth SEMESTER

Wednesday, 22th April, 2015

10:30 A.M. to 1:30 P.M.

PS06CHT01

[Software Engineering-II]

Maximum Marks: 70

Q-1 Multiple Choice Question.[Each Question carries one Mark] [10]

- 1) _____ defines a possible a set of option.
A) State B) Behavior C) Class D) Identity
- 2) If an operation specified in class is always redefine in sub class than operation can be define as _____.
A) Friend B) Static C) Pure virtual D) Abstract
- 3) _____ is the property that specifies how tightly bound the elements module are.
A) Cohesion B) Polymorphism C) Abstraction D) Coupling
- 4) OCP stands for _____.
A) open closed problem B) object closed principle
C) open class principle D) open closed principle
- 5) _____ cohesion occurs when a higher Layer accesses the services of a lower layer , but lower layer do not higher layer.
A) Layer B) Communicational
C) Functional D) None
- 6) The User's _____ is the image of the system that end users carry in their tasks.
A) User B) Design
C) Implementation D) Mental
- 7) An _____ object represents application-specific data that are not directly manipulated.
A) Source B) Target
C) application D) Interface
- 8) A human Engineer establishes a _____ model.
A) User model B) Mental model
C) Design model D) Implementation model
- 9) ITG stands for
A) instantaneous test group B) integration testing group
C) individual testing group D) independent test group
- 10) Which testing is an integration testing approach that is commonly used when "shrink-wrapped" software products are being developed?
A) Regression Testing B) Integration testing
C) Smoke testing D) Validation testing

[P. T. O.]

- Q-2 Give Answers for the following:(Any ten) [20]**
- 1 List major steps in dynamic modeling.
 - 2 Define classes and object.
 - 3 List and draw design notations for object oriented design.
 - 4 List down three important roles of traditional component.
 - 5 List characteristics of reuse environment.
 - 6 List steps of conducting component level design.
 - 7 What do you mean by open/closed principles?
 - 8 List Interface Design steps.
 - 9 List Golden rules for user interface design.
 - 10 Define Latency Reduction and visible Navigation.
 - 11 Write merits of Smoke Testing.
 - 12 What do you mean by conditional testing?
- Q - 3 A) Explain state, behaviour and identity detail. [05]**
B) Explain Design Notation and specification with example. [05]
- OR**
- Q - 3 A) Explain Inheritance and Polymorphism. [05]**
B) What is the relationship between OOA and OOD ? [05]
- Q - 4 Explain Component-Level Design Guidelines. [10]**
- OR**
- Q - 4 Explain content, common, control and stamp coupling in detail. [10]**
- Q - 5 A) Explain Design Issues in detail. [05]**
B) List tasks represents a workflow for Webapp interface design and explain any three in detail. [05]
- OR**
- Q - 5 A) Explain Interface Analysis and Design models. [05]**
B) List Webapp Design principles and guidelines and explain any three in detail. [05]
- Q - 6 A) What do you mean by System testing? Explain in detail [05]**
B) Explain Test strategies for Object Oriented software [05]
- OR**
- Q - 6 A) Explain Strategic Approach to software testing [05]**
B) Explain behavioral Testing. [05]
