

[A-30]

No. of Pages: 02

Sardar Patel University
M. Sc. Information Technology (Integrated) Examination
Semester: - VI (CBCS)
PS06CIIT03: Computer Graphics
27th April, Monday, 2015

Time: 10:30am to 01:30pm

Total Marks: 70

Q-1 Select an appropriate option.

10

1. _____ is not the application of Computer Graphics.
(a) Computer Aided Design (b) Presentation Graphics
(c) Power Point (d) Computer Art
2. _____ Technique is used to modify or interpret existing pictures.
(a) Computer Art (b) Image Processing
(c) Visualization (d) None of the Above
3. _____ Color display method is used in Random scan display.
(a) Shadow mask (b) Beam Penetration
(c) Color display (d) None of the above.
4. Odd-even rule also known as _____.
(a) Odd-parity rule (b) Even-parity rule
(c) Only (b) (d) Both (a) and (b)
5. The overall design style for a set of characters is called _____.
(a) Character style (b) Face style
(c) Typeface (d) Character face
6. _____ style is used to fill an area with selected hatching patterns-parallel lines or crossed lines.
(a) Hatch (b) Solid (c) Patterned (d) Hollow
7. Rotation point is also known as _____.
(a) Rotation angle (b) Rotation axis
(c) Pivot point (d) translation vector
8. An area on a display device to which a window is mapped is called a _____.
(a) window (b) viewport (c) clip window (d) viewing transformation
9. Default background color of stage in FLASH is _____.
(a) red (b) blue (c) black (d) white
10. To transform a gradient or bitmap fill, _____ tool is used in FLASH.
(a) Free transform (b) Ink bottle (c) Paint bucket (d) Fill Transform

Q-2	Answer the following questions. (Any TEN)	20
1.	Define the term Aspect Ratio.	
2.	State disadvantages of DVST.	
3.	State disadvantage of Beam Penetration method.	
4.	List the joins used when two line intersect. Explain any one.	
5.	List various character attributes.	
6.	Differentiate: serif and sans serif fonts.	
7.	Define : (i) Translation (ii) Reflection	
8.	Explain point clipping. State condition for clipping a point.	
9.	Define rotation. Give rotation matrix for 2-dimensional rotation transformation.	
10.	Define: (i) Layer (ii) Frame	
11.	List different file formats that can be published in FLASH.	
12.	State use of Eyedropper and Pan tool.	
Q-3		
(a)	Explain working of CRT in detail.	05
(b)	Differentiate between Raster scan displays and Random scan displays	05
	OR	
Q-3		
(a)	List all types of input devices and explain any two in detail.	05
(b)	Write a brief note on software standards.	05
Q-4	What is filled area primitive? Write a short note on scan line polygon fill algorithm.	10
	OR	
Q-4	Explain concept of line drawing and Write steps for DDA line drawing algorithm.	10
Q-5		
(a)	What is geometric transformation? List all 2-D geometric transformation and explain any one in detail.	05
(b)	Explain window-to-viewport coordinate transformation.	05
	OR	
Q-5		
(a)	What is text clipping? List out all types and explain it with example.	05
(b)	Explain in brief Sutherland Hodgeman polygon clipping algorithm.	05
Q-6		
(a)	What is onion skinning? Explain the use of onion skinning in detail.	05
(b)	Explain mask animation with example.	05
	OR	
Q-6		
(a)	List types of symbols used in FLASH. Explain any one of them in detail.	05
(b)	Explain motion tween animation with example.	05
