SEMESTER – VI : September-2020
B.Sc. CA & IT

PS06CIIT01: Software Engineering - II

Date : 22-09-2020, Tuesday Time: 10:00am to 12:00noon Max. Marks: 70

Q.1 Multiple choice of Question:

10

- [1] The various components of information and object encapsulates can be viewed as _____ of the object.
a) Class b) Entity c) Attributes d) All of the them
- [2] _____ in property of an object that distinguishes it from all other objects.
a) State b) behavior c) Class d) Identity
- [3] _____ that defines which parts of an object of a class can be accessed from outside and how?
a) An interface b) Instance variable
c) A class body d) None of the above
- [4] _____ component that implements a complete or partial function that is required by the customer.
a) Control b) Problem Domain
c) Infrastructure Domain d) Interface
- [5] A _____ is a modular building block for computer software.
a) Component b) Object c) Table d) None
- [6] OCP stands for _____.
a) open closed problem b) object closed principle
c) open class principle d) open closed principle
- [7] An _____ Is the current state of the interface.
A. Interaction mode B. Action mode C. Edit mode D. None
- [8] The User's _____ is the image of the system that end users carry in their tasks.
a) Mental b) User c) Design d) Implementation
- [9] By collecting _____ during software testing, it is possible to develop meaningful guidelines to halt the testing process.
a) Failure intensity b) Testing time c) Metrics d) None
- [10] Test cases should uncover errors like _____.
a) Nonexistent loop termination
b) Comparison of different data types
c) Incorrect logical operators or precedence
d) All of the mentioned

Q.2 Fill in the Blank and True / False

08

- [1] Non-Strict inheritance occurs when the sub class does not have all the feature of parent class or some features can be redefined.
[True / False]
- [2] Among two object, if at least one of them acts on the other and at least one of them is affected by the other is known as _____.
- [3] _____ coupling occurs when a component communicates or collaborates with infrastructure components.
- [4] Common coupling occurs when one component modifies data that is internal to another component. [True / False]
- [5] A source object represents application-specific data that are not directly manipulated. [True / False]

- [6] A human Engineer establishes a _____ model.
[7] ITG stands for _____.
[8] When some coverage is reached then testing process stops.
[True / False]

Q.3 Answer the following questions in short (Any 10): **20**

- [1] Define event.
- [2] Define classes and object.
- [3] Define State.
- [4] List characteristics of reuse environment.
- [5] List steps of conducting component level design.
- [6] Define Interfaces
- [7] Define mental model.
- [8] List categories of user and explain any two.
- [9] Define Anticipation.
- [10] Define unit testing and integration.
- [11] Explain smoke testing?
- [12] Explain non-incremental integration.

Q.4 Answer the following questions in Long (Any 4): **32**

- [1] Explain Dynamic Modeling and Functional Modeling.
- [2] Explain inheritance and polymorphism in detail.
- [3] Explain analysis and design for reuse.
- [4] Explain content, common, control and stamp coupling in detail.
- [5] Explain User Analysis and Design Issues in detail.
- [6] Explain any two golden rule for Interface design.
- [7] Explain White box and Black box testing in Detail.
- [8] Explain Webapp and System Testing.
