

SARDAR PATEL UNIVERSITY
M. Sc. (IT) INTEGRATED EXAMINATION, VI SEM

Date : 2nd APR 2016, Saturday

Session : Evening

Course No : PS06CIIT01

Time : 02:30pm To 05:30pm

Sub: Software Engineering - II

Total marks : 70

- 1 Multiple Choice Question

[10]

- i) The various components of information and object encapsulates can be viewed as _____ of the object
 a) Class b) Entity c) Attributes d) All of them
- ii) The state and services of an object together define it's _____.
 a) State b) Class c) Behavior d) Identity
- iii) If an operation specified in class is always redefine in sub class than operation can be define as _____.
 a) Friend b) Static c) Pure Virtual d) Abstract
- iv) _____ cohesion occurs when a component performs a targeted computation and returns a result.
 a) Layer b) Communicational c) Functional d) None
- v) _____ coupling occurs when a component communicates or collaborates with infrastructure components.
 a) Routine b) Inclusion c) External d) Stamp
- vi) An _____ object represents application specific data that are not directly manipulated
 a) Source b) Target c) Application d) Interface
- vii) System _____ time is measured from the point at which the user performs some control action until software responds
 a) Input b) Output c) Response Time d) None
- viii) By collecting _____ during software testing, it is possible to develop meaningful guidelines to halt the testing process.
 a) Failure intensity b) Testing time c) Metrics d) All of above
- ix) What do you understand by V & V in software testing.
 a) Verified version b) Version and validation
 c) Verification and Validation d) version and verification
- x) Which granularity level of testing checks the behaviour of module cooperation?
 a) Unit testing b) Acceptance testing
 c) Integration Testing d) Regression Testing.

- 2 Short Answer attempt any ten (Each carry 2 marks)

[20]

- i) What are the steps of the design methodology for producing an object oriented designing?
- ii) List and Draw design notations for object oriented design.
- iii) What do you mean by adjustment in inheritance?
- iv) List characteristics of reuse environment.
- v) What do you mean by open/close principles?
- vi) Define Domain Engineering.
- vii) List golden rules for user interface design
- viii) List design issues.
- ix) Define anticipation and latency reduction.
- x) Draw a diagram of Testing strategies and Testing steps.
- xi) Write steps which is used to evaluate the class model.
- xii) Write steps of bottom up integration strategy.

Q – 3	What is the relationship between OOA and OOD ?	[10]
OR		
Q – 3	Explain Inheritance and Polymorphism in detail.	[10]
Q – 4	a) Explain Basic design principles	[05]
	b) Explain functional and layer cohesion	[05]
OR		
Q – 4	a) Explain content, common, control and stamp coupling	[05]
	b) Explain component composition in detail.	[05]
Q – 5	a) List webapp design principles and guidelines and explain any three in detail.	[06]
	b) Explain user analysis.	[04]
OR		
Q – 5	a) List tasks represents a workflow for webapp interface design and explain any three in detail.	[06]
	b) Explain design issues	[04]
Q – 6	a) Explain Top down and Bottom up integration testing.	[06]
	b) Explain white box testing.	[04]
OR		
Q – 6	a) Explain strategic approach to software testing.	[06]
	b) List the type of integration testing and write regression testing and smoke testing.	[04]

$\chi = \chi = \chi$
